Aktobe - 2020

Content

(b) Definition, Investigation, and Analysis

(i) Definition – nature of the problem

Description of the client

My client is Yerzhan Umirzakov, the first President of the UNESCO club "NIS Aktobe". The club was founded in February 2019 in NIS Aktobe. The UNESCO club is an Association of people of all ages, all social and professional backgrounds who share the ideals of UNESCO and strive to spread them and make them part of the international community. UNESCO organizations in all areas included in the concept of science, culture and education.

The main goal of the club is to promote UNESCO values in the school community and among citizens. The club operates under the management of KAZFUCA and has a private corner in NIS Aktobe. The UNESCO NIS Aktobe club has more than 120 members, and new members are still joining the club. All participants are registered through the press Secretary, as he manages everything. You must fill out a form with your personal data and pay a non-refundable fee. All applications are sent twice a year to the Central office of Almaty, where everyone receives a passport and a club badge. Also, the work of press secretaries requires drawing up a report on the activities for one academic year and sending it to KAZFUKA. So, he asks all 120 participants what they did throughout the year.

It is worth noting that due to quarantine measures in the country, since everyone was asked to stay at home, registration becomes inconvenient, since everyone sends their applications to mail, messengers and thus there is a possibility of data loss. This consumes time to load them and consumes memory to store all applications. However, the payment process has become more convenient, since the Kaspi application saves the names of the payers and the payment of each participant is made out in the receipt.

Current system

The club is based at the school, so all information about joining the club is sent via corporate Outlook mail, and the press Secretary issues printed registration forms for offline training. However, due to the pandemic and quarantine measures, registration takes place by sending instructions for joining the club to those interested in joining by mail, and they in turn print all the forms, fill out and return the scanned version back, then contact them For payment. Registered participants are added to the What's App group, where everything is discussed, and initiators create separate groups to organize projects. The press Secretary in the leading group of What's App plans to hold meetings, date and time. If this is a face-to-face meeting, then it is held in the corner of the club, and with distance learning, everything goes through the channels of MS Teams. At these meetings, participants discuss new ideas and receive notifications about future events.

In addition, our club has Instagram and Youtube accounts, but there has been no activity recently. Thus, all information with announcements about the club's activities is also placed in Outlook.

The source of all data

All applications of participants from registration are stored in the press Secretary's folder, some-in electronic format, and others-in printed version. Information and event details are stored in the what's App chat and added to the report once a year.

Types of data

Press-secretary sent her report made in the 2019 year about general clubs Activity and participants. Also, provided with the application and details important for registration. The principal gave information about projects and Instagram, YouTube accounts.

This is table is from participants passport. It shows the way every member needs to fill their participation in clubs projects. There are 6 questions and 3 of them general about event and others about your particular perception of event.

(ii) Investigation and Analysis

Investigation

It is my first work on such clubs, which have their own standards based on KAZFUCA, so it will be more comfortable to conduct an interview with my client. Moreover, this type of clubs is something new and no information could be found in Internet, that is the reason of not choosing data research in my project. To use time wisely, it is better to conduct two interviews. First one will cover general questions about current system and special requirements. At second interview I will come with proposed solution to get a feedback.

Interview #1

Date: 19.10.19

A: Aidana Baglanova

Y: Yerzhan Umirzakov

A: Hello, I am Aidana Baglanova. I heard that you founded and become a president of NIS Aktobe UNESCO club. I would reallu appreciate if you will tell me more about your clubs work.

Y: Hello, yes. So, firstly our club already joined 140 people and know after official announcement of our club, we started to work on projects.

A: Do you have any special requirements to enter your club.

Y: Actually, it is only necessary to fill an application and submit participation fee for press -secretary. First year participation fee is 750 tg, while following years request 450tg. After registration you will receive passport and clubs sign, also we add all members to What's App chat.

A: For what What's App chat is needed?

Y: In our group we could tell about clubs new projects, manage meetings once in a month where everyone can suggest new ideas. However, we are too much messages and some people are missing important links and announcements, as a result it effects whole clubs activity.

A: What is the clubs activity now?

Y: Honestly, from 140 members only 30 people taking part in clubs life and a lot of students after getting passports never participate in projects. There are several reasons for that, but I want to point out major cause is that people are not notified and it reminded about project dates, so everyone miss them.

A: What passports are used for?

Y: In passport besides personal details, you also will be given a passport number. Moreover, it contains 10 pages for records about Participation in KAZFUCA projects: name of the event, date, location, your impressions, your wishes, what you did you get to know. Furthermore, we collect all passports once a month to make a report for Central office about clubs Activity.

A: How do you present your report?

Y: We just type everything into one table. It seems easy process, but very time-consuming for sure.

A: Thank you very much, now when I have a clear picture of clubs work, I can think of possible suggestions to optimize your work.

Observation
Now I have all necessary knowledge about their system and his work, so I can suggest to make a database where everyone would type by themselves their participation details. Secondly, everything will be saved comfortably in table, which reduces all repeated work. Next one, is to make a database with all answers in one format, the most comfortable is digital as collecting paper information could lead to errors in understanding handwriting and storing. People could forget to submit, while by databases you can control all documents. Considering all this points and having several ideas, it is better to conduct second interview and ask preferences of chair, so people

External research
Date: 25.10.2019

A: Aidana Baglanova

Y: Yerzhan Umirzakov

A; Hello, looking on your current system I founs several processes of your work that could be optimized.

Y: Hello, so let's start then and show what you can suggest.

A: Firstly, is to create a database for report on participation in projects by KAZFUCA, where will be access to every member. So, everyone could fill data on their participation. Moreover, it is more time-efficient as data could be saved automatically.

Y: Yes, I really liked the way you concocted it, I wish it will work as good as you described.

A: If you liked it, I can continue with transferring registration on digital format as you mentioned the handwriting is very hard to encrypt sometimes that is why if everyone will fill and send applications it will be more time effective. Furthermore, it will be much easy to regulate number of participants. It is worth to mention that application contained 4 pages and printing it every time would be contradict your clubs policy.

Y: I even didn't thought about it and I see a point as printing application forms for 140 members was not eco-friendly as all application are just laying on my table, they don't have any particular use rather than counting of clubs participants.

A: At the moment, If you are enjoyed by improvements and give your permission, we could discuss how to represent it.

Y: Yes, I am totally fine.

A: I would recommend to make a website, it is a great option for multi-tasking. Moreover, we can add special features as projects, news and write information about club, so everyone who joins club will have a first impression.

Y: You did a very good job by concerning such details and it will help clubs development as people could found about us at world wide web.

A: Thank you very much. Do you have any special requirements for future website?

Y: Yes, I would like to put our logo in the website, also make all site in blue colors maybe with red, and put a links for our social medias with geolocation.

A: Okay, thank you!

Observation

After the second interview, Yezhan agreed with my solution and made some remarks to interface and content. Client wants to have in new system: online application form, submitting online participation on projects and ability to see all data in table. The site will be in blue-red colors and

Evidence of agreement with the client

От 25 октября 2019 года

Утверждение критерий

Утверждение критерий для проектной работы по предмету Информатика "Optimizing work of NIS Aktobe UNESCO Club" Баглановой А.М., заказчиком Умирзаков Е.

С заказчиком была согласована разработка веб-страницы для NIS Aktobe UNESCO club. Ниже перечислены одобренные критерии Умирзаковым Е.

1. Создание формы для подачи заявлений на вступление в клуб
2. Создание формы для отправки отчета об участии в мероприятиях KAZFUCA
3. Создание таблицы со всеми отчетами
4. Соответствие цветам клубам и интерсный дизайн

Так же должно быть учтено, что работа должна быть выполнена в назначенные сроки (начата с 26.10.19 по 1.09.20) и выполнена с минимальными затратами для заказчика.

При возникновение технических неполадок, изменения в работе должны быть обговорены с заказчиком (Умирзаков Е.).

Роспись разработчика

Flowchart

Figure 9 Flowchart for old system

DFD

Data Flow Diagram 0 level
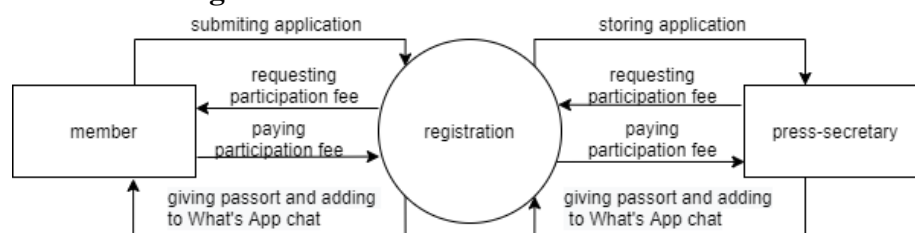

Figure 10 DFD 0 level for current system

Data Flow Diagram 1 level
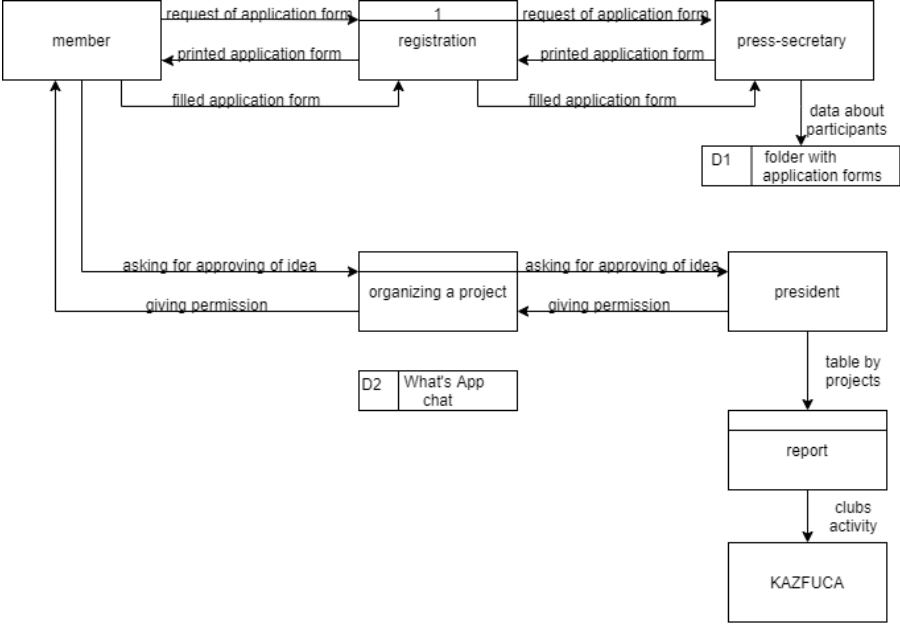

Figure 11 DFD 1 level for current system

Analysis of the work of the current system

This system is adapted to the online format, which is undoubtedly a plus. However, you may notice the disadvantages in the storage of information and its dissemination. All registration forms do not have a special storage space and there is information necessary for printing passports that you have to enter yourself in the table to send to KAZFUCA.

Inputs and outputs of the current system

Input	Process
Application form	Registration
Participation fee	Report
Participation on projects	
Output	Storage
Passport	What's App chat
UNESCO club sign	

Table 1 Inputs and outputs of the current system

Alternative solutions

	Benefits	Drawbacks
Mobile Application	All data will be saved The club could become more popular The App may require payment to get Fund for Club Comfortable to add participation in projects as phone is always under hands.	The App will not be available on PC The downloading App uses a memory, which is not convenient for members

		It will be inconvenient to download application Installation costs
Facebook Page	Social medias are in daily use Easy to get noticed	Does not provide necessary functionality to save all data Can be hacked
Web site	Easy to use Databases can be used Looks more official fo such organization Can be made without any costs	Takes more time than others
Telegram Bot	Popular decision Comfortable to post news	It is not convenient to store all information
Google Drive Folder	Very comfortable to store data Members can have access to update	Data loss

Table 2 Alternative solutions

Chosen solution

Website seems as most suitable solution to optimize clubs work. Moreover, I have a good background at coding, which could make system processes smooth.

Requirements

1. The registration form with opportunity to submit digital application form.
2. The opportunity to add participation on projects.
3. The table with all information.
4. News and information about club.

(C) Design

Nature of the solution

Requirements for the new system

<div align="center">Site design:</div>

1. User-friendly design
2. The site should have the logo of the club

<div align="center">Site features:</div>

1. The main page with a place at the end to leave active links for social medias
2. A news page with the opportunity to add them by admin
3. An "about us" page with essential information about our club's history
5. Registration form with necessary information about member also add an application and additional question about fee
6. Login form and personal profile

7. Form to add by particular user a participation in projects by KAZFUCA
User features:
1. User should add participation on projects
2. Users should register and attach filled registration
Admin features:
1. Admin should be able to add new admins
2. Admin should have a personal page to see reports and members
3. Admin should have the opportunity to add news
4. Admin should have opportunity to delete any row in tables

Software requirements

Requirement	Software	Reason
Operation system	Windows (7,8,10) macOS	These versions of OS required owing to previous do not support site functions
Security	Any antivirus like Avast or Kaspersky	These antiviruses will provide security
Program	MySQL	This program provides servers to store data
Internet connection	Wi-fi or modem	The website works only in online mode
Programming	Xampp Notepad++	For writing code and connect with hosting
Other applications	Photoshop, Visual Paradigm, Microsoft Word	To make the site design and describe all processes in DFD of the new system

Table 3 Software requirements

Hardware requirements

Hardware required	Device	Function
Input devices	Keyboard QWERTY and touchpad	To fill forms and move within the website
Output devices	Monitor	To see the website
Laptop or PC	Any device with access to the internet	To create a website
Modem or WI-FI	Any internet type	To have access to website and transfer information
Storage	USB, Google disk	To back up copies and archive

| | | information to avoid data loss |
| CPU | Intel Core i5 or later versions | To have access to information |

Table 4 Hardware requirements

Entity-relationship diagram
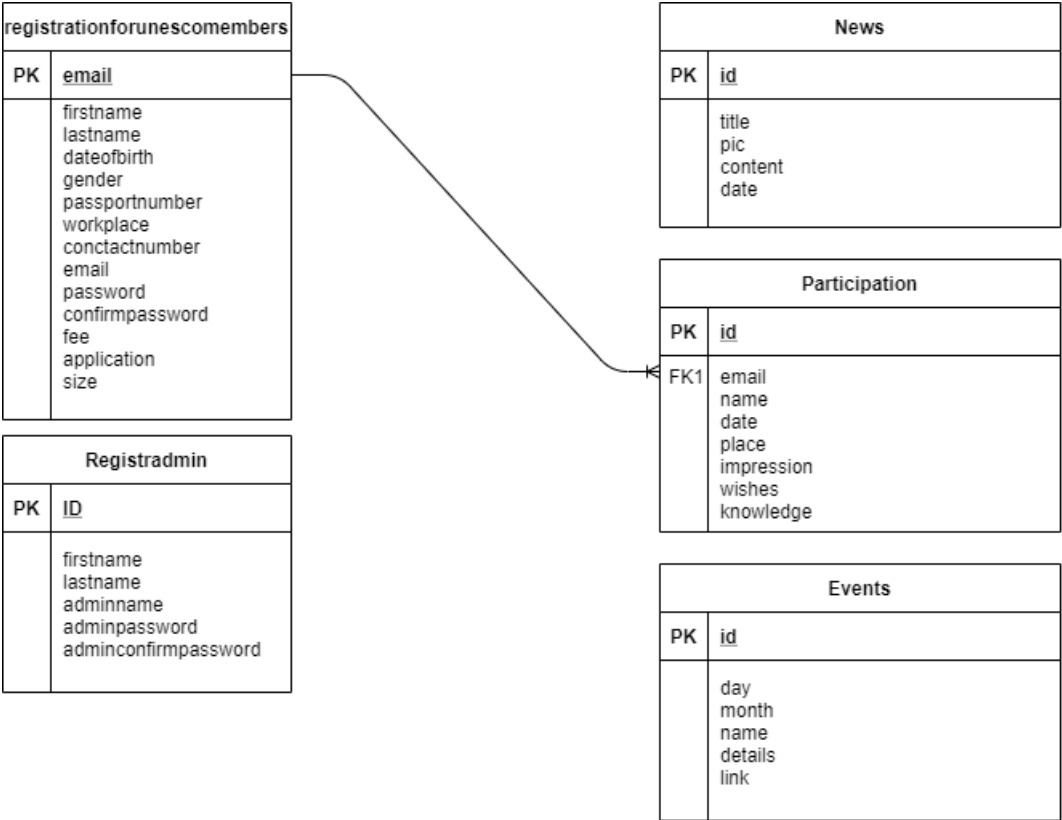

Figure 12 ERD

Inputs and outputs of the New System

Input	Process
1. Firstname	1. Registration of members
2. Lastname	2. Add news
3. Date of birth	3. Add administrators
4. Gender	4. Delete information
5. Workplace	6. Login
6. Conctactnumber	7. Add projects

8. Password	9. Add participation on projects
9. Confirmation password	
10. Fee	
11. Application	
12. Size	
13. Name of participated project	
14. Date of participated project	

15. Place of participated project	
16. Impression on participated project	
17. wishes on participated project	
18. knowledge from participated project	
19. Admin first name	
20. Admin last name	
21. Admin username	
22. Admin password	
23. Admin confirmation password	
24. Title for news	
25. Pic for news	
26. Content for news	
27. Date of news	
28. Day of new project	
29. Month of new project	
30. Name of new project	
31. Details of new projects	
32. Link to new project	
Output	Storage
1. personal profile 2. posted news 3. posted events	1. Database SQL

Table 5 Inputs and outputs of new system

The structure of the website will look like this graph below:

For unregistered users	For members	For admin
1. Main page 2. About us 3. News 4. For members 5. Registration	1. Join new projects 2. Rating 3. Login 4. Personal profile	1. Admin panel 2. Add admin 3. Members information 4. Add news 5. Login

Table 6 The structure of the website

Data Flow
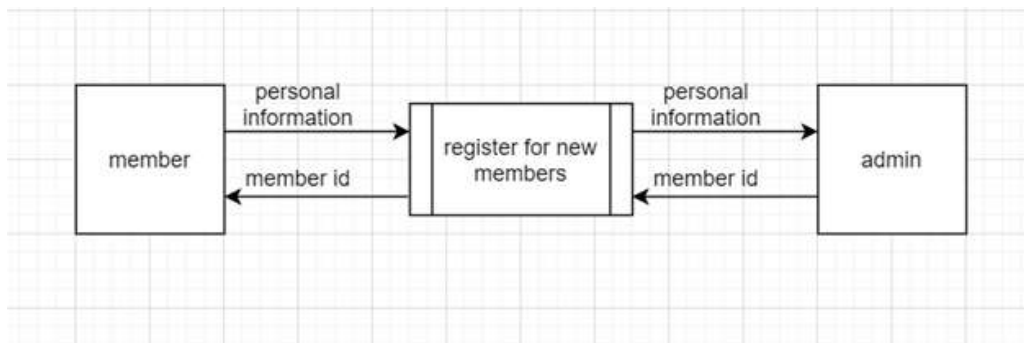

Figure 13 Data Flow Diagram of New System 0 Level

This DFD illustrates the primary process, which is registration. This process goes among two external entities, who are members and admin. The member gives all required personal data with which the admin adds him for club and assigns id.
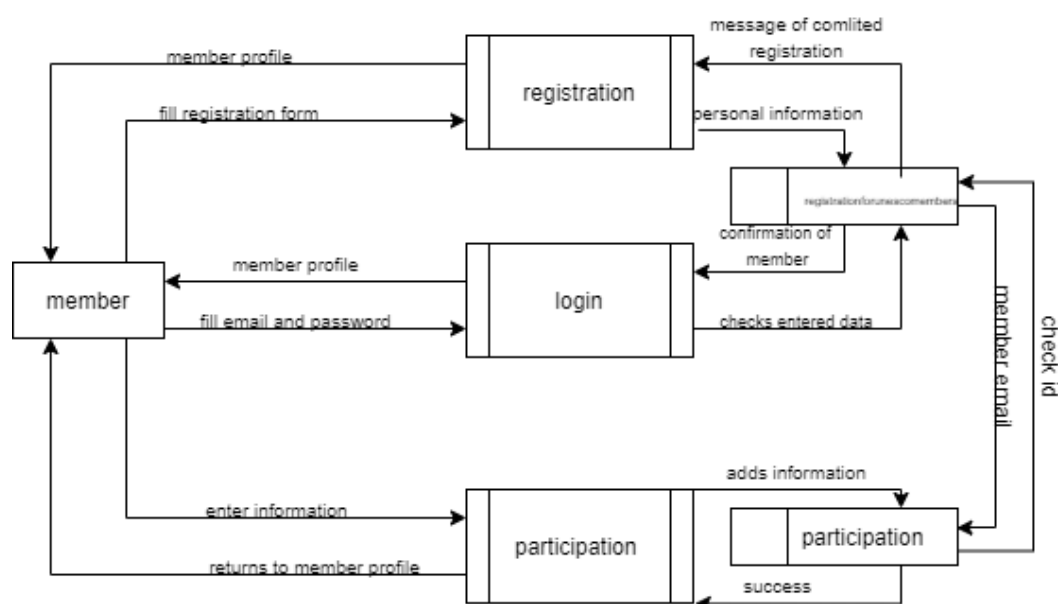

Figure 14 Data Flow Diagram of New System 1 Level for member

This DFD illustrates all processes from the user perspective on a future website. In total, there are three processes, which are registration, login and participation on projects conducted by KAZFUCA.

For registration, the member gives personal information, and all this received information is stored in a database. As a result, for member shows his profile.

The next process, which is connected to the same table, is log in. After filling email and password member gets confirmation by the system and his profile opens.

The last but not least is process called participation, where you fill required form about participated project and all this information stored in table called "Participation". Email of participant will be taken from table "registrationforunescomembers" by comparing id's. In case of successful adding information to database member will return to the profile.

Admin functions
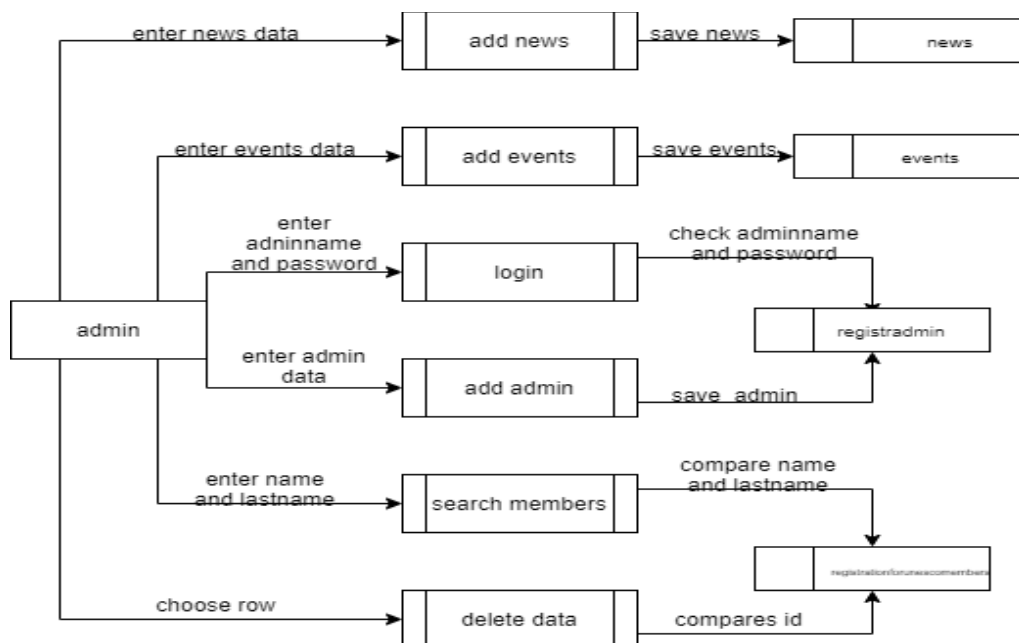

Figure 15 Data Flow Diagram of New System 1 Level for admin

This data flow diagram represents processes administrators can do: add news, add events, search and view member information, and add other admins.

The first process requires input title, date, image, URL, and text, which will be stored at table "news" and published automatically in news page.

The same process goes for events, where you need write day, month, name of event and details with link. Everything will be stored in "events" table and display on new projects page.

If the admin wants to get member information, he will be required to write his full name, and this member will be searched by id from the member table called "registrationforunescomembers" after member information will be displayed to the admin in table with opportunity to delete him. Actually, by default admin will see table with all members.

Add other admin is also an essential process, by writing admin details, which will be saved at admins table. To log in to the admin page, the admin is asked to write an admin name and password, which will be compared with the admin table's data and give further access to the admin panel.

https://akxnisunesco.000webhostapp.com/mainpage.php

Structure of the website

The website will be created according to client requirements. They are pages for preliminary information, history of the club, news, login, and member. A member should be a registration form and projects. All pages should have the name of the club and logo, also the opportunity to leave comments. Admin panel should have the possibility to add news and add admins.

Website map
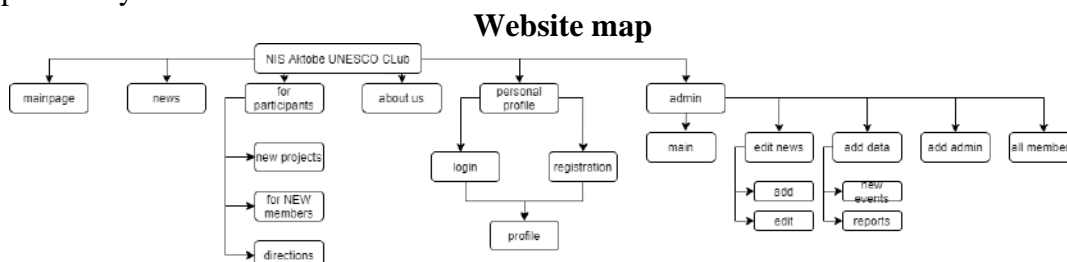

Figure 25 Structure of the website

Prototyping the new system

I created a prototype of the future site, which was developed in an online platform, Wireframe. Cc.
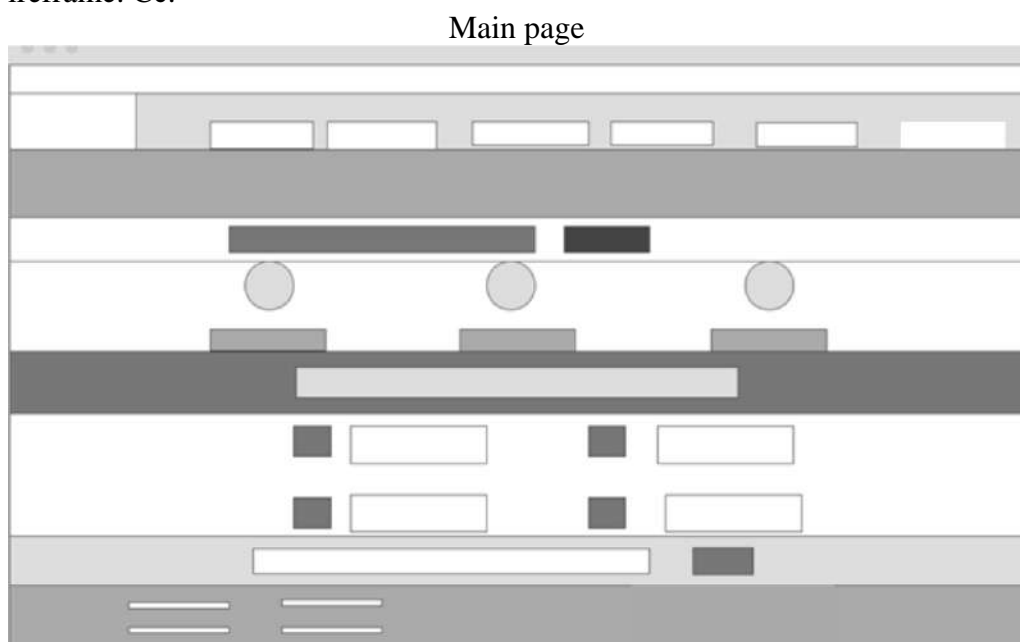

Main page

Figure 26 Prototype of main page

This is the prototype of the Main page. The top of the web page will be located the site's name and header with logo and five main buttons for five pages. Their words from the left to the right "Main page," "News," "For members," "About Us," "Personal Profile" and "Admin". After will be located photo and invitation to join the club, three circles represent free categories in circles as "our team," "new projects," and "directions" with a short description at three boxes. The next line will be a motivational phrase because the UNESCO club should call everyone to achieve SDG. At four next cells will be placed information about four main directions of the club with photos to make it attractive for users. At the bottom will be placed fast links, contact information, and space to leave a message, feedback, or questions. The website will be done primarily in blue and white colors because it is the UNESCOs flag color and means the desire to unite the whole world in the struggle to victory the ideas of independence, friendship, and peace.

News page
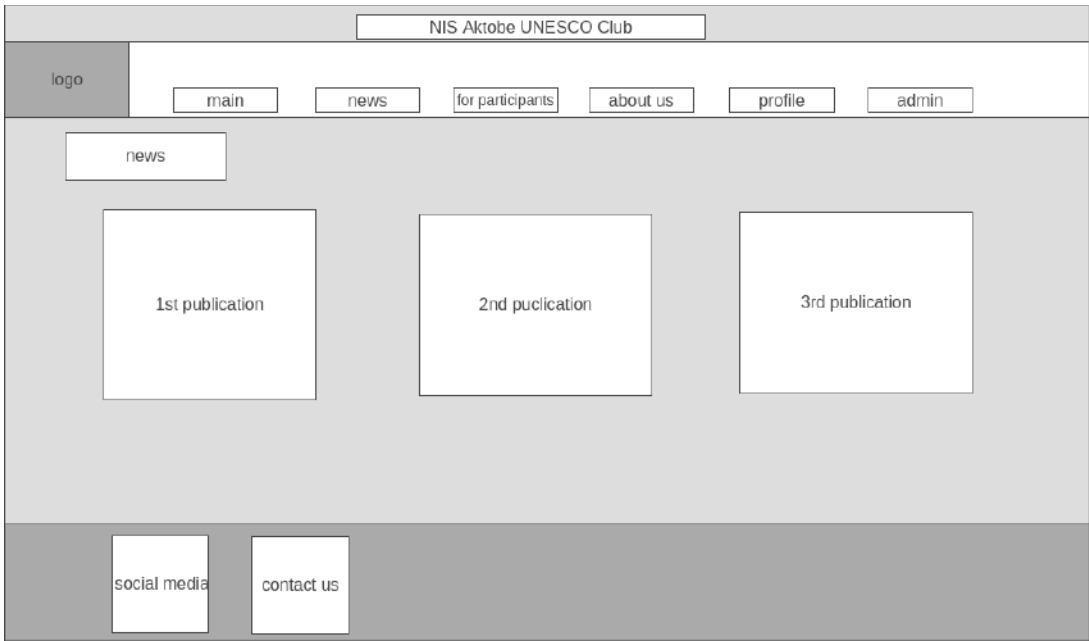

Figure 27 Prototype of news page
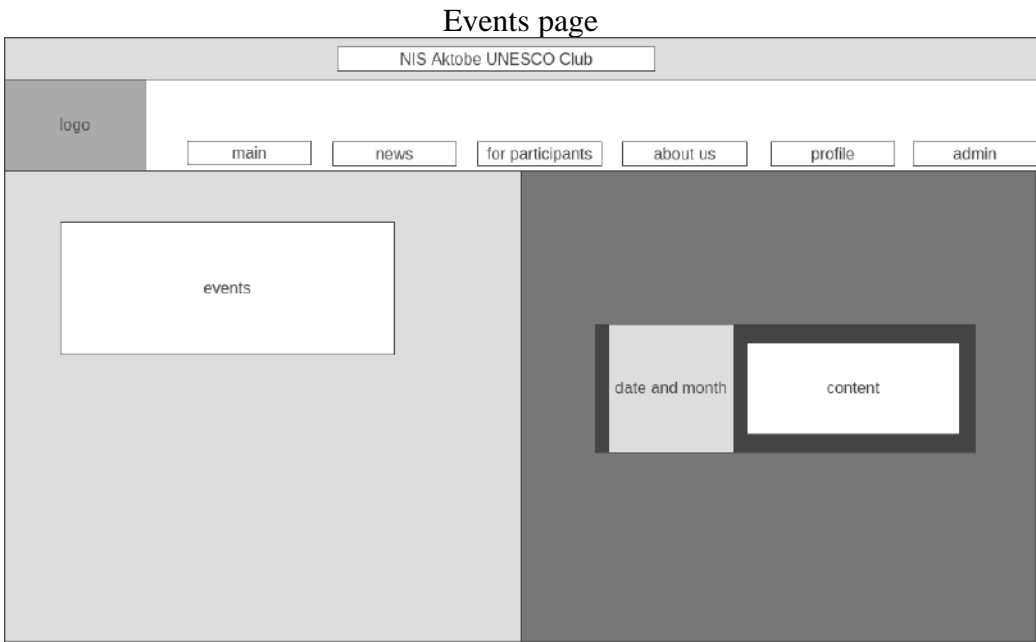

Events page

Figure 28 Prototpe of events page

For new members
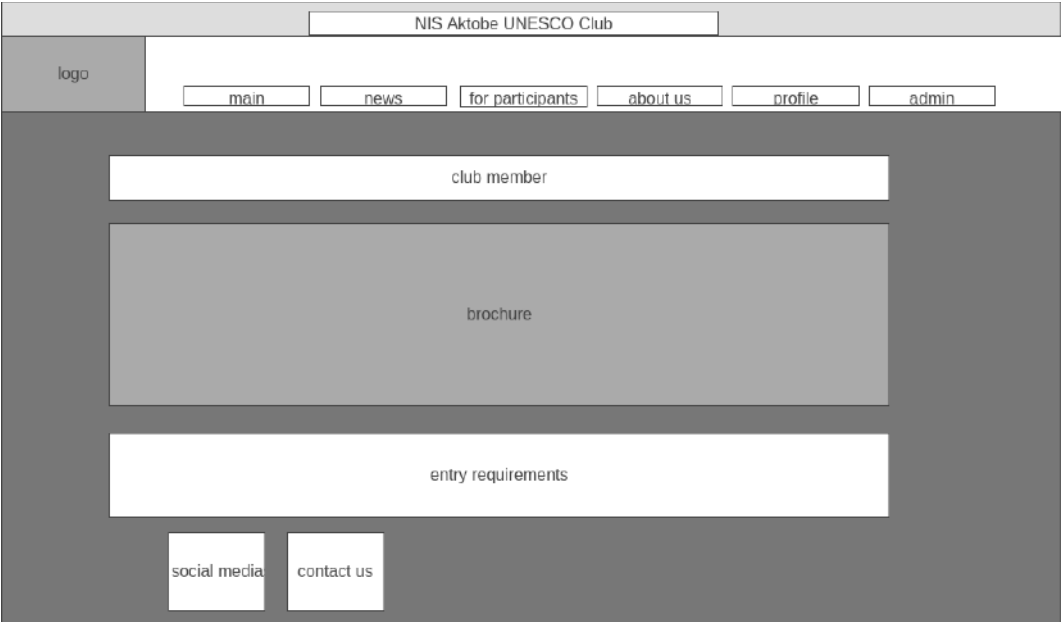

Figure 29 Prototype of for new members page
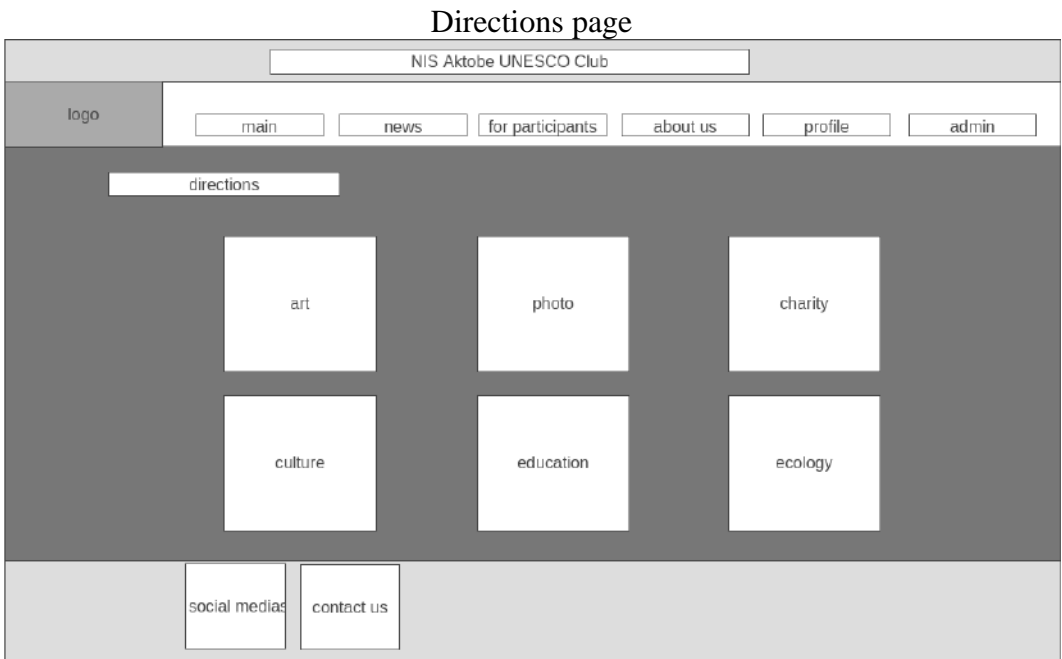

Directions page

Figure 30 Prototype of directions page
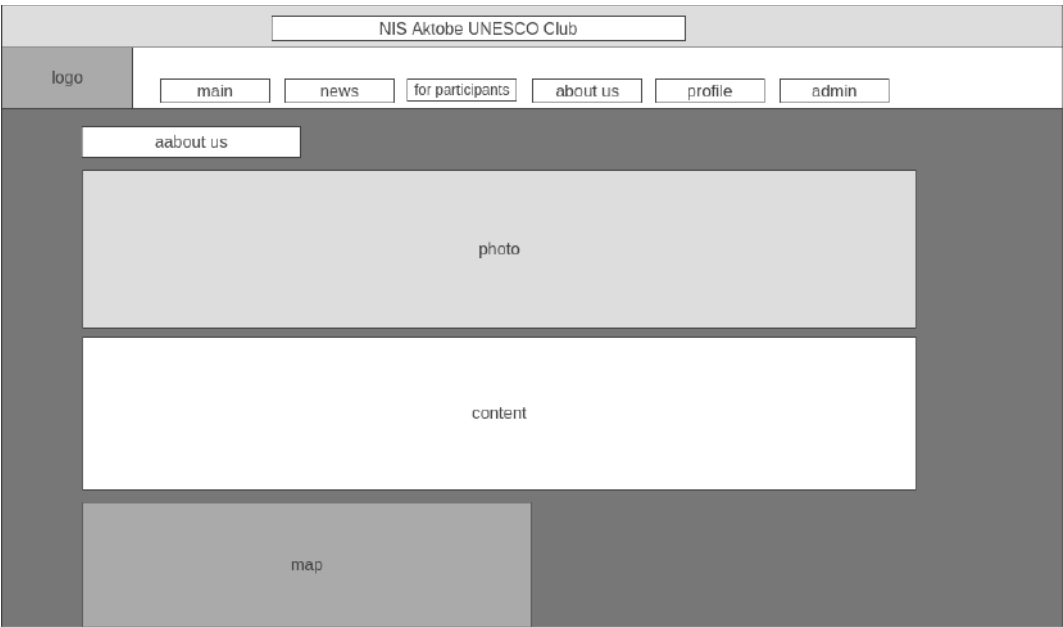

About us page

Figure 31 Prototype of about us page
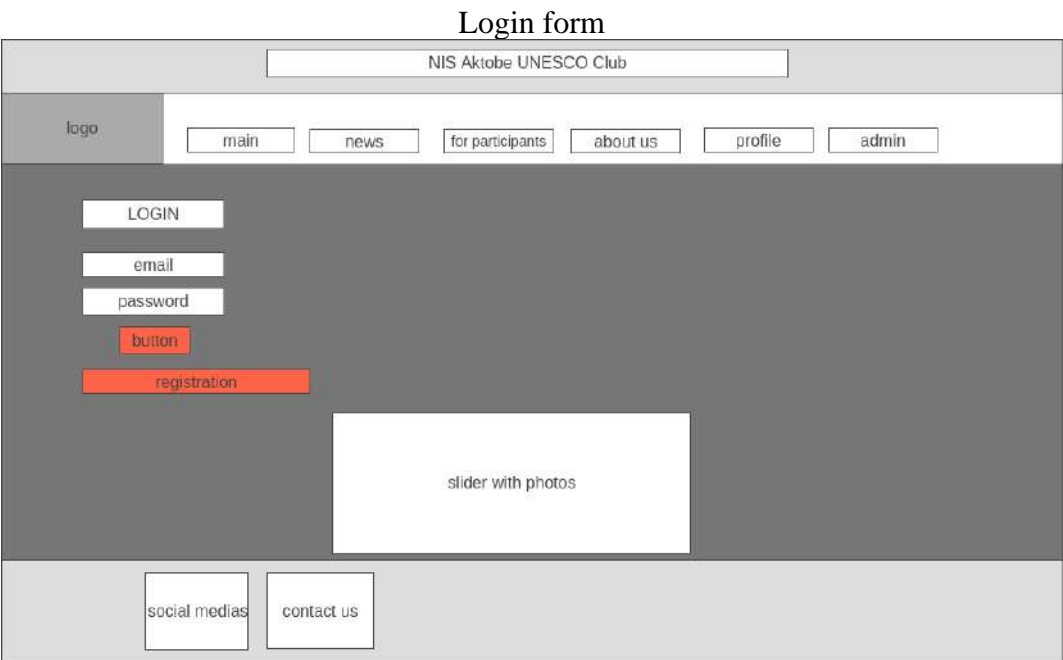

Login form

Figure 32 Prototype of login form page

The login page contains cells to enter email and password and a button—slider with photos located below.

Registration form

Figure 33 Prototype of registration form

This page has the same header. However, the content is different because of the registration process, and all runners will contain cells to enter personal details. To make the process more comfortable at the gender and fee option, I added a radio button, so users will not waste time for easy questions.

The personal profile page

Figure 34 Prototype of personal profile

The personal profile also has the same footer and header. The member at his profile will have photo, overview, settings, tasks, help, edit, and log out buttons. The content in information will be changed according to the chosen button.

Login form to admin panel

Figure 41 Prototype of search and view members forms in admin panel

Agreement with client

The prototype of the site I fully described in the prototype file. However, owing to the pandemic, it was more wisely to send from Whatsapp Messenger. The client gave good feedback, so I could further start programming.
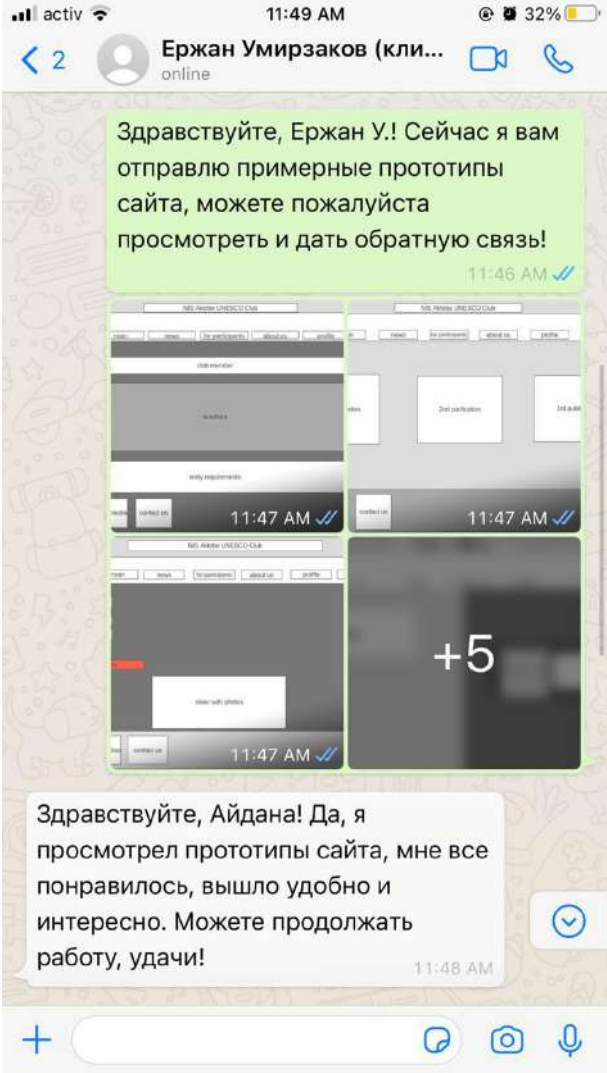

Figure 42 screenshot of the conversation with the clien

https://akxnisunesco.000webhostapp.com/mainpage.php

Intended benefits

1.   Admin can post news on his own. Furthermore, add a photo and date.
2.   Admin can add other admins. Also, update and delete them.
3.   Admin can post new projects.
4.   Admin has the opportunity to look for members' information and search member by name and surname.
5.   It is time-efficient as members can register online, and about all details they can be contact by phone or email. Moreover, they will know all news and about all new projects. It saves time as there is no importance to organize meetings.
6.   Everything is saved at database and tables, so press-secretary will not waste time on routine work by rewriting same information.

iii.**Limits of the scope of the solution**

Object of limit	Reason
Internet connection	Website is available only online
Hardware	Website available only at laptop. There is no mobile version.
Database	SQL database is done manually

Table 7 limitations

(d) software development, programming, testing and installation

(d) (i) Development

According to my clients requirements I created a database UNESCOCLUB, which contains 5 tables with connection between them.

1.The main table registrationforunescomembers with all basic information about participants and additionally questions as application and fee, which is needed for my client for further work.

2.The participation table is used to save data of members on participated KAZFUCA projects. The data will be saved under id of user.

3.The news table with all necessary details to publish a post.

4.The events table with all necessary details on future projects.

5.The registradmin table is necessary to add another admins into the system.
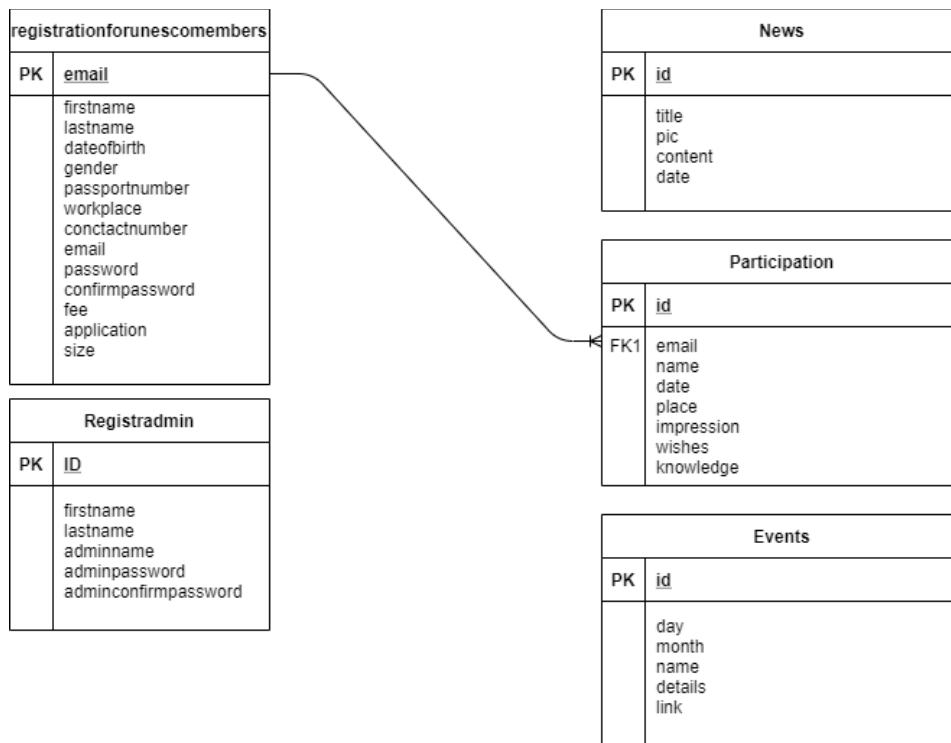

Figure 43 UNESCOCLUB database structure
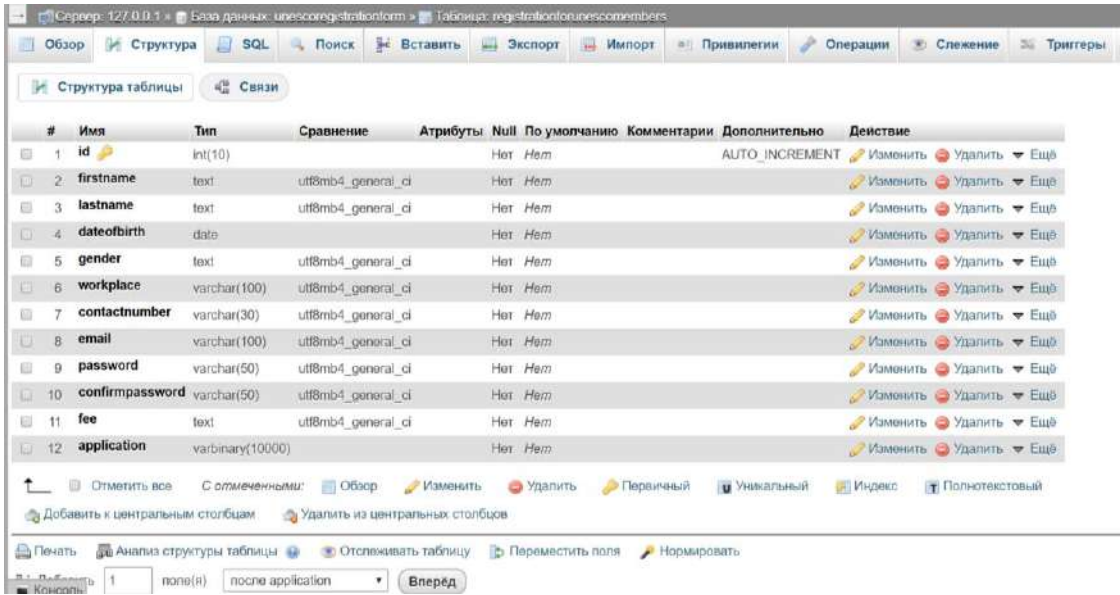

Table registrationforunescomembers

Table has 13 rows, they are id, first name, last name, date of birth, gender, workplace, contact number, email, password, confirm password, fee, application, size. All of them must be filled. By first name and last name I check if this person already registered or no. Email will be used in login process that is why it also should be unique. Password could consist of words, numbers or symbols and must be confirmed. Moreover, then it will be saved in encrypt version for database in order to save confidentiality. Contact number required due to it will be used by administrators, who are press secretary of club and presidents, in order to add member for UNESCO Aktobe clubs Whats App chat. If person agree to pay fee passport his personal information as first name, last name, date of birth and gender will be send for Kazazhstan Federation of UNESCO clubs. Application and workplace is needed for personal member portfolio.

Field name	Type	Length	Validity	Description	Example
id	integer	10	Auto increment	assigns a number to each user	1
First name	text		Can contain only text	Members first name	Айдана
Last name	text		Can contain only text	Members last name	Багланова
dateof birth	date		Should be filled by dd.mm.yyyy	Members date of birth	13.01.2003
gende r	text		Two possible text values	Members gender	женщина

workplace	varchar	100	It should contain information about work or study place and position there.	Members work or study place and position	Студент НИШ ФМН г Актобе
Contactnumber	varchar	30	Should be written as 8-xxx-xxx-xx-xx	Members telephone number	8-777-777-77-77
email	varchar	100	Should contain @ symbol	Members email	aidana@gmail.com
password	varchar	50	Can contain any symbol	Members encrypt password	c4ca4238a0b923820dcc509a6f75849b
confirmpassword	varchar	50	Should contain similar symbols written in password	Confirmation of password	
fee	text		Two possible text options show agreement or disagreement for paying a fee to get a passport and clubs member sign.	fee status	Хорошо
application	varbinary	10000	Text file which should be uploaded	Upload application	Багланова Айдана.docx

Table 8 table "registrationforunescomembers"

Figure 44 Table registrationforunescomembers in phpmyadmin
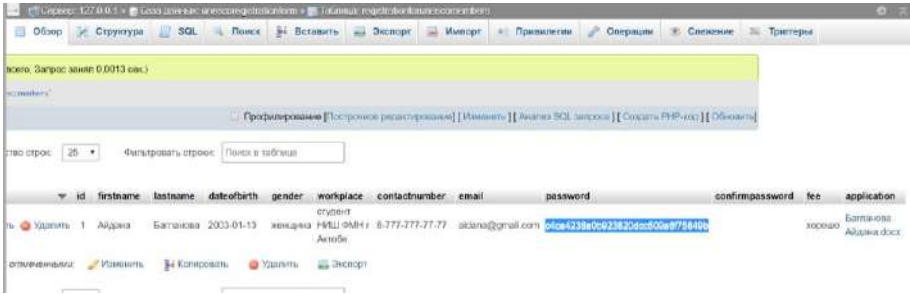

Figure 45 Filled table registrationforunescmembers in phpmyadmin

Table registradmin

This table contains from 6 rows , they are "id", "firstname", "lastname", "adminname", "adminpassword" and "adminconfirmpassword". All of them are required to fill. ID is auto increment variable, firstname and lastname are needed to recognize a person. The adminname couldn't repeat and should individual for all admins as they will login by him. The adminpassword and adminconfirmpassword on registration process and they should be identical that is why there is no need to fill field two times with same information.

Field name	Type	Length	Validity	Description	Example
id	int	11	Auto Increment	Admin id	5
firstname	text	-		Name of admin	Aidana
lastname	text	-		Surname of admin	Baglanova
adminname	text	-		Adminname for authentication	Admin1
adminpassword	text	-		Adminpassword for authentication	qwerty
adminconfirmpassword	text	-		Checking for similarities with admin password because users input is masked and to avoid mistype user need to confirm password	

Table 9 registradmin table
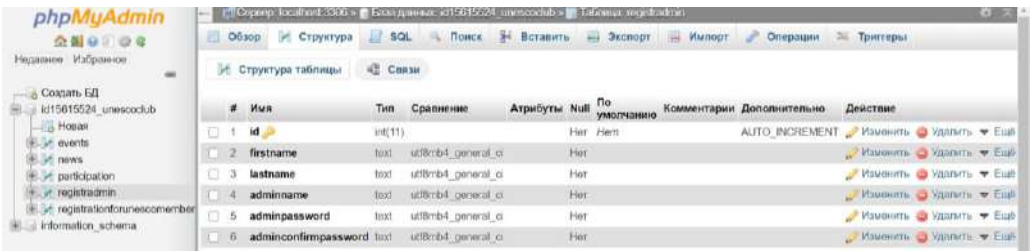

Figure 46 registradmin table in phpmyadmin

https://akxnisunesco.000webhostapp.com/mainpage.php
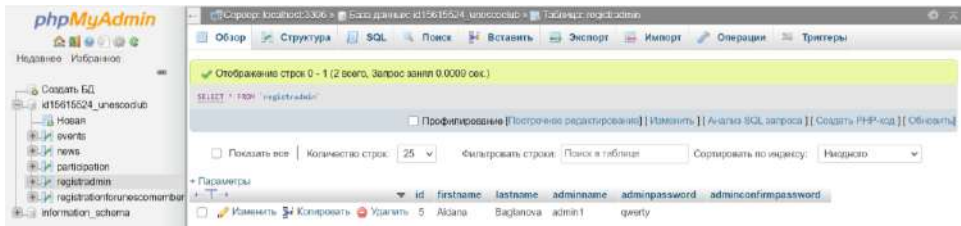

Figure 47 data in registradmin table

Table events

This table contains of rows, they are "id", "day", "month", "name", "details" and "link". ID is auto increment variable, all others are requested to fill. Everything added to this table is saved in database and automatically displayed in new projects page.

Field name	Type	Length	Validity	Description	Example
id	int	11	Auto Increment	ID of event	1
day	Text	-	Should be written in required format	Day of event	12
month	Text	-	Should be written in format "DEC", only three letters	Month of event	ДЕК
name	Text	-	Can contain all symbols	Name of event	**ПЕРВАЯ ОФЛАЙН-КОНФЕРЕНЦИЯ МОДЕЛИ ООН В 2020 ГОДУ**
details	Text	-	Can contain all symbols	Details of event	Школьный клуб "Модели ООН" рад пригласить Вас на нашу 4-ю ежегодную конференцию MUN, которая состоится 12 декабря в Международной школе Акбобек, Актобе.
link	Text	-	Can contain all symbols	Link to participate on event	https://nisakxmun.wixsite.com/website

Table 10 table events

Figure 48 table events in phpmyadmin
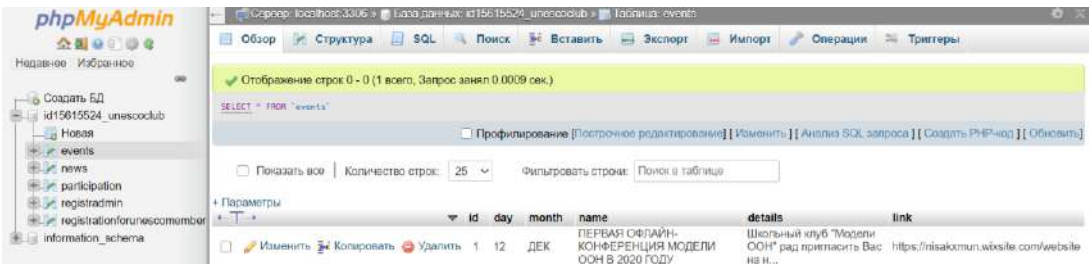

Figure 49 data in table events

Table news

This table contains from 5 rows, they are "id", "tittle", "pic", "content" and "date". ID is auto increment variable, while all other fields are required to fill. Every correctly entered information is saves in this table and automatically displays on news page. Moreover, information from this table displays on admin page and rows can be deleted.

Field name	Type	Length	Validity	Description	Example
id	int	11	Auto Increment	News id	1
tittle	text	-	Can contain all symbols	News tittle	Trash Tag Challenge
pic	blob	-	File in png format	News picture	
content	longtext	-	Can contain all symbols	News content	Участники нашего клуба приняли участие в глобальном тренде #Trashtagchalleng. . Члены клуба при поддержке Молодежного Ресурсного Центра приняли участие в уборке одной из самых загрязненных улиц города. Проведение мероприятий такого рода

Table 11 news table

Figure 50 news table in phpmyadmin
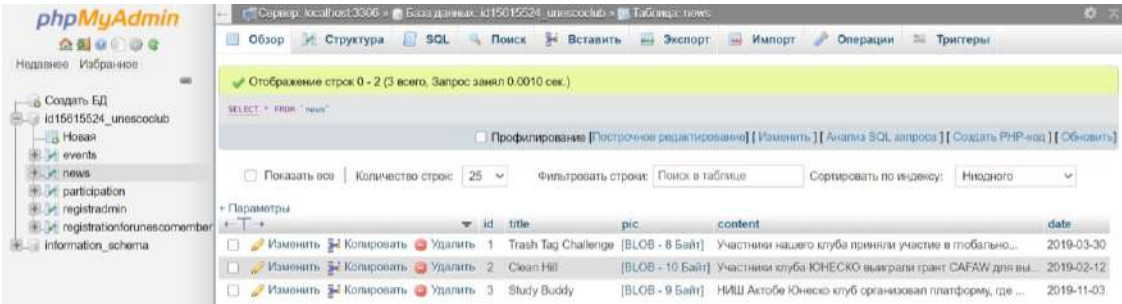

Figure 51 data in news table

Table participation

This table is contains from 8 rows, all of them connected to the participation on the projects conducted by KAZFUCA and taken from passport except from two first. ID is auto increment variable, and email is taken from user as this form located on members personal profile, but all information displays on admin panel report page.

Field name	Type	Length	Validity	Description	Example
id	Int	11	Auto Increment	Participation reports number	3
email	Text	-	should be in the right form	Participants email	Baglanovaaidana @gmail.com
name	Text	-	Can contain all symbols	Participants name	Aidana Baglanova
date	Date	-	Should be in right form	Date of participation	2020-11-17
place	Text	-	Can contain all symbols	Place of participated project	НИШ

impression	longText	-	Can contain all symbols	Impression on participated project	cool
wishes	longText	-	Can contain all symbols	Wishes on participated project	Больше стаканов
knowledge	longText	-	Can contain all symbols	New received knowledge	О стилях

(d)(i) Programming

Used programs

XAMPP due to is a very easy to install Apache Distribution for Linux, Solaris, Windows, and Mac OS X. The package includes the Apache web server, MySQL, PHP, Perl, a FTP server and phpMyAdmin. **Notepad**++ is a text and source code editor for use with Microsoft Windows. It supports tabbed editing, which allows working with multiple open files in a single window.

Figure 54 logo of the XAMPP and Notepad++

Software requirements for the developing the website

Software	Reason
XAMPP	To save information about members, admin, news and update it further
Notepad++	To write code

Programming
Code for sign up form

Figure 55 Registration form

The filled registration form data is saved at database called "unescoregistrationform" at table "registrationformforunescomembers". How it can be seen first and last name are checked for uniqueness. Undoubtedly, email should be also checked for uniqueness because it will be used at login. Password and confirm password are encrypt. All values are checked for valid characters.

(d) (iii) Testing

The website is focuses on client requirements and the main objects are online format solution, including ability to conduct a registration for participants and the opportunity to authorize, also the separate page for presidents.

The white box testing was held during writing code by me as person, who knows whole code. The purpose to test code, which is visible to tester in order to primarily verifying the flow of inputs and outputs through the application, improving design and usability, strengthening security.

That is why, to check to test the system against external factors responsible for software failures will be used tracing table. The three type of inputs will be reviewed as typical one, erroneous and extreme values. After the output values will be compared with the expected values. Coincidence of two results will confirm the correct operation of the program.
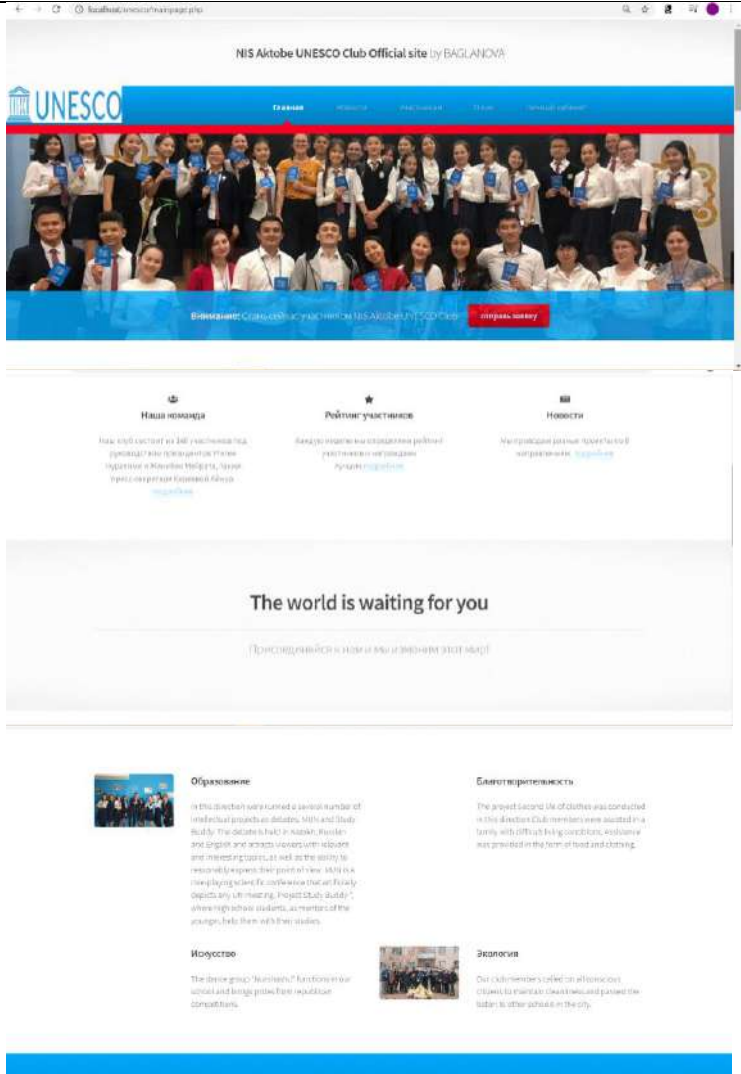

Test №	Description	Data Type	Expected Results	Actual Result	Pass/Fail	Cross reference
1	site displays images, labels and in appropriate containers when you run it	Typical-open on web browser forms	The website has design and everything shows correctly	The website has design and everything shows correctly	Pass	T1.1
2	Registration form	Typical- all information entered correctly	new row in database created and profile page opened	new row in database created and profile page opened	Pass	T2.1
		Extreme-then email is already used	Message "Account with this email already exists"("Аккаунт с данной почтой уже существует")	Message "Account with this email already exists"("Аккаунт с данной почтой уже существует")	Pass	T2.2
		Extreme-then data filled is too long	Message «Веднные данные превысии количество символов»	Message «Веднные данные превысии количество символов»	Pass	T2.3
		Erroneous-phone number written in incorrect format	Message "Введите данные в указанном формате"	Message "Введите данные в указанном формате"	Pass	T2.4
		Erroneous – email in incorrect format	Message «Адрес электронной почты должен содержать символ @»	Message «Адрес электронной почты должен содержать символ @»	Pass	T2.5
		Erroneous – then one of the requirements	Message "Заполните это поле"	Message "Заполните это поле"	Pass	T2.6
		are left empty				
		Erroneous - then password and confirm password don't match	Message «Пароли не совпадают»	Message «Пароли не совпадают»	Pass	T2.7
3	Login form	Typical – everything filled correctly	Profile page opens	Profile page opens	Pass	T3.1
		Erroneous – incorrect user email and/or password	Message «Не верно введена почта или пароль»	Message «Не верно введена почта или пароль»	Pass	T3.2
4	log out	Typical- personal profile closes	Page for authorization (login page) opens	Page for authorization (login page) opens	Pass	T4.1
5	Registration of admins	Typical – all information filled correctly	Message "The new record has been added"	Message "The new record has been added"	Pass	T5.1
		Extreme- more than 255 symbols written	Message "the number of values exceeded"	Message "the number of values exceeded"	Pass	T5.2
		Erroneous – empty labels	Message "fill this record"	Message "fill this record"	Pass	T5.3
		Extreme – the name of admins is already used	Message "Profile with this admin name is already created"	Message "Profile with this admin name is already created"	Pass	T5.4
6	Login of admins	Typical – everything filled correctly	Main page opens	Main page opens	Pass	T6.1
		Erroneous – incorrect Admin name and/or password	Message «Не верно введено имя админа или пароль»	Message «Не верно введено имя админа или пароль»	Pass	T6.2
		Extreme – empty admin name was submitted	Message "Введите имя админа"	Message "Введите имя админа"	Pass	T6.3
		Extreme – empty admin password was submitted	Message "Введите пароль"	Message "Введите пароль"	Pass	T6.4
7	Update admin data	Typical- new data recorded and updated in database	Message" Your data is updated"	Message" Your data is updated"	Pass	T7.1
		Errorneous- data written not in suitable format	Message-" Your data is not updated"	Message" Your data is not updated"	Pass	T7.2
8	Delete admin data	Typical – the row is deleted from the table regitradmin in database	Message- "The row is deleted"	Message- "The row is deleted"	Pass	T8.1
9	Add participation on project	Typical – everything entered correctly	Returns to profile. Message "entry added"	Returns to profile. Message "entry added"	Pass	T9.1
		Erroneous- the data is not entered	Message "fill in this field"	Message "fill in this field"	Pass	T9.2
10	Add news	Typical – everything entered correctly	News displayed on news page	News displayed on news page	Pass	T10.1
		Erroneous - not all fields are entered	Message "fill in this field"	Message "fill in this field"	Pass	T10.2
11	Delete news	Typical – the row is deleted from the table news in database	Message- "The row is deleted"	Message- "The row is deleted"	Pass	T11.1
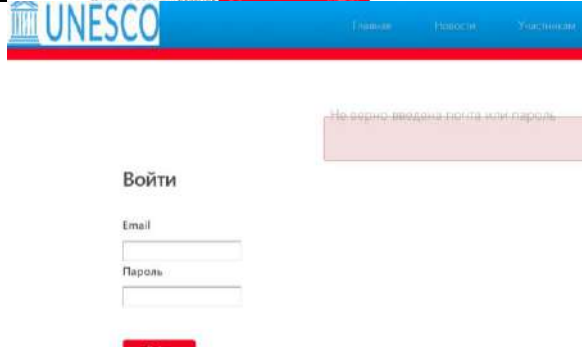

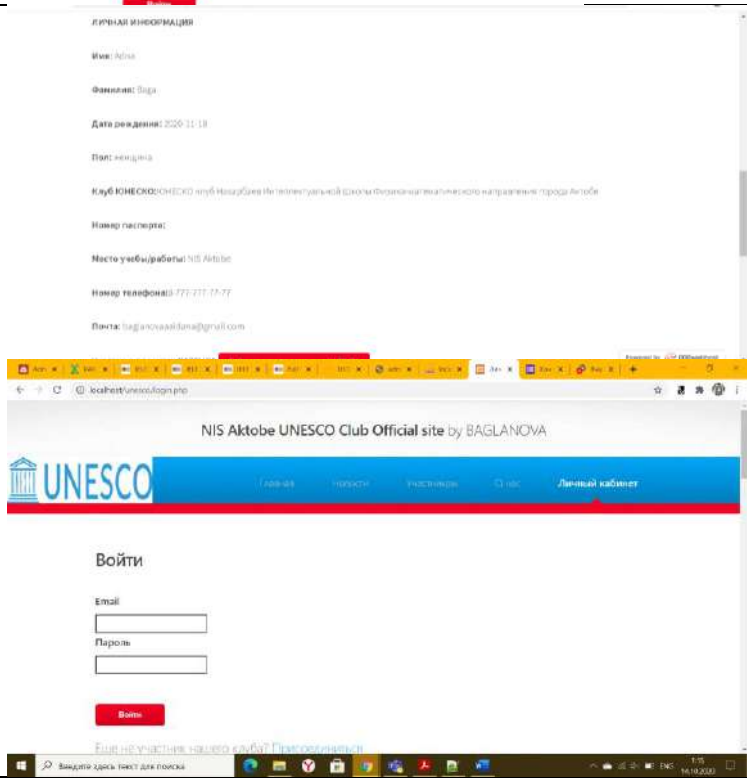

12	Add new projects	Typical – everything entered correctly	New projects displayed on events page	New projects displayed on events page	Pass	T12.1
13	Search members	Typical – name and surname entered correctly	Information about member with such name and surname	Information about member with such name and surname	Pass	T13.1
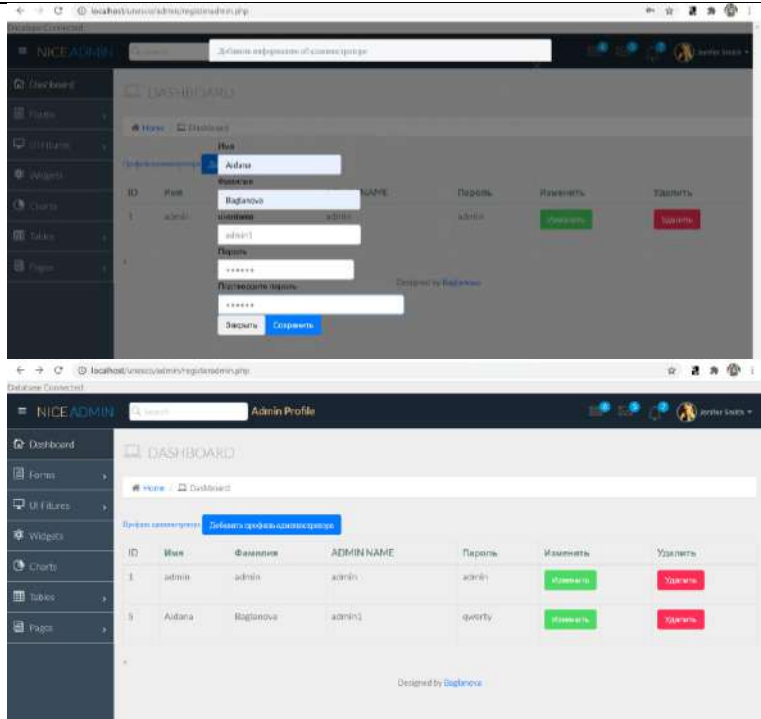

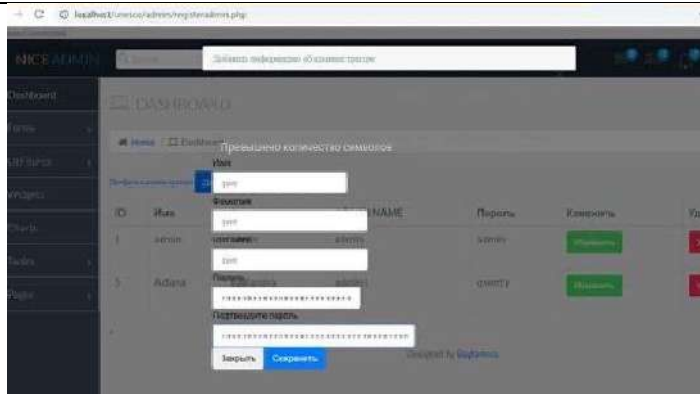

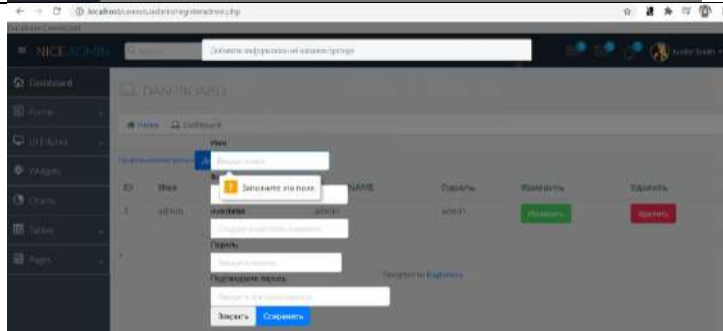

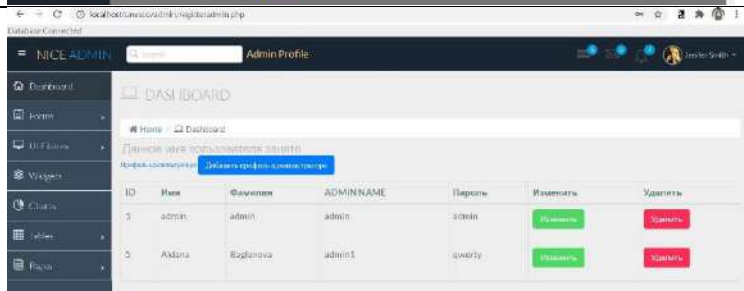

Table 14 Testing
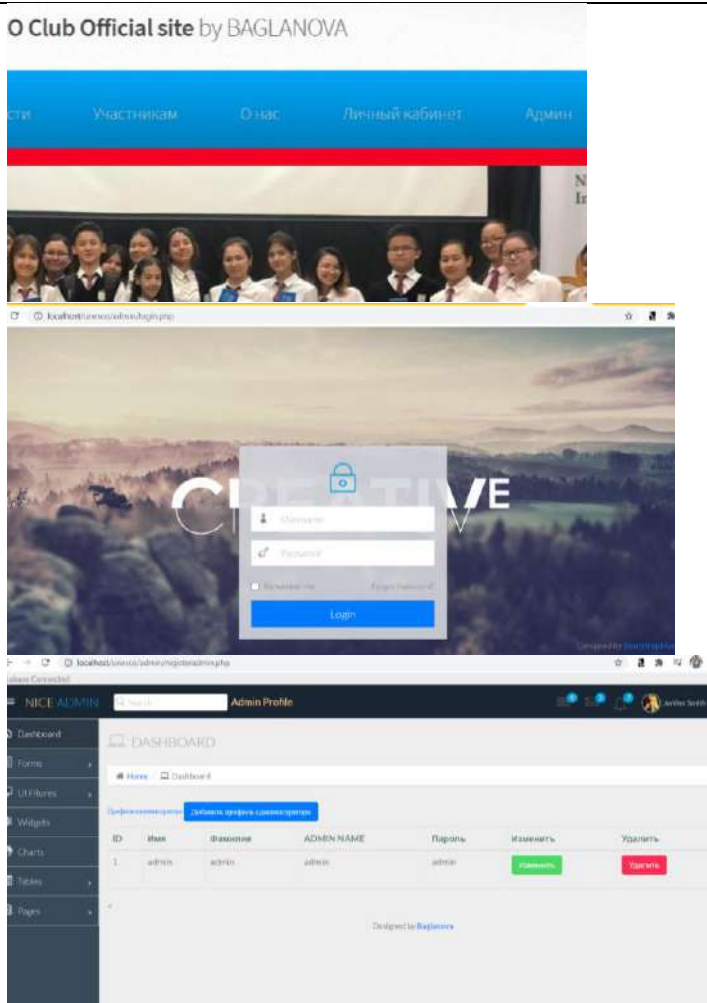

T1.1	Main page interface opened well in browser and site is running properly	
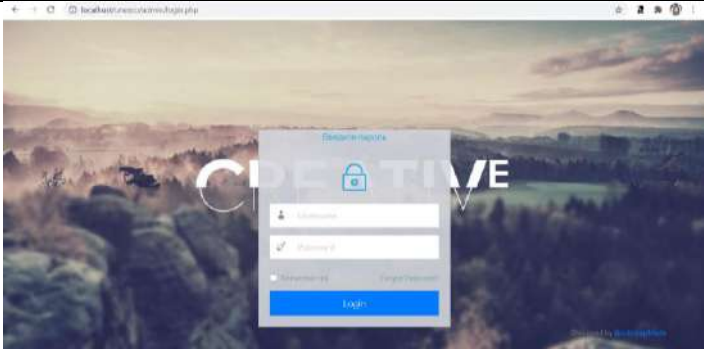

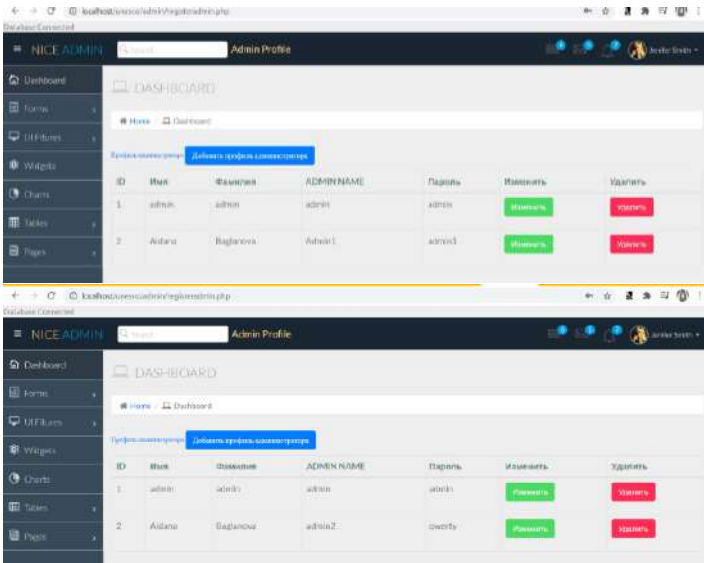

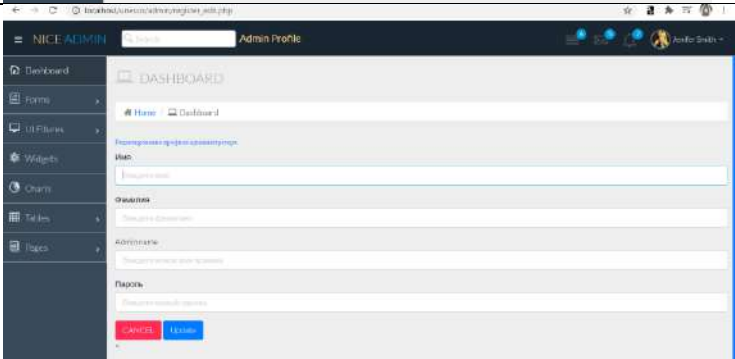

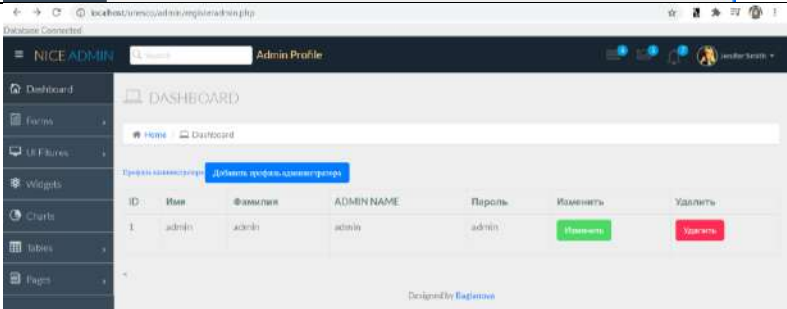

T2.1	Correctly filled registration form, as a result personal profile opened and new record was added in registration database		
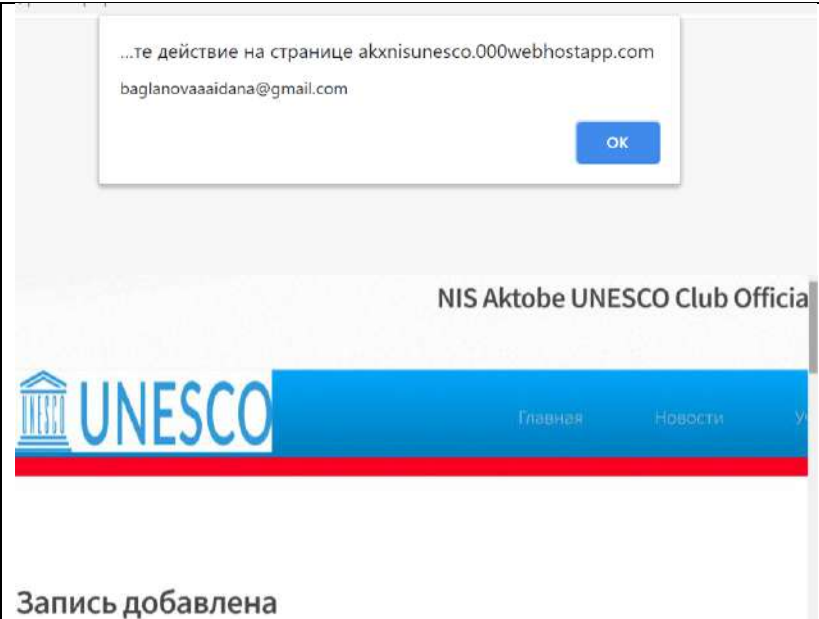

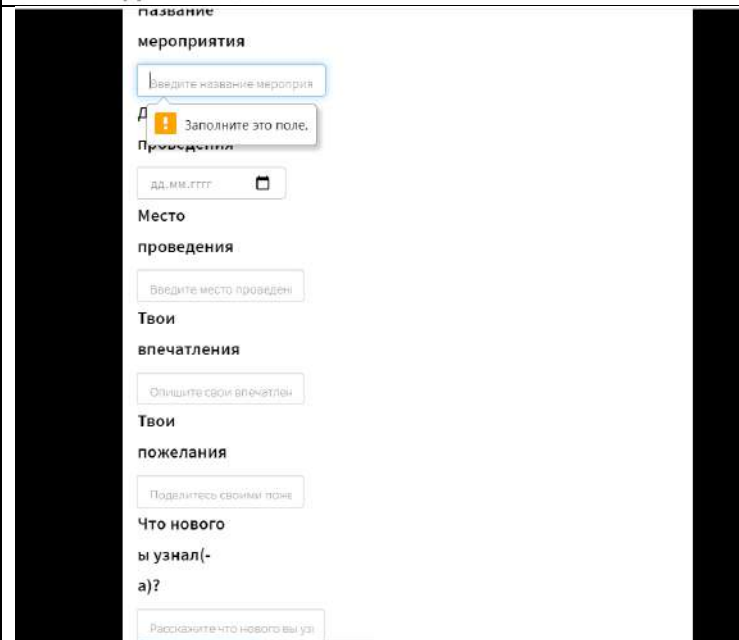

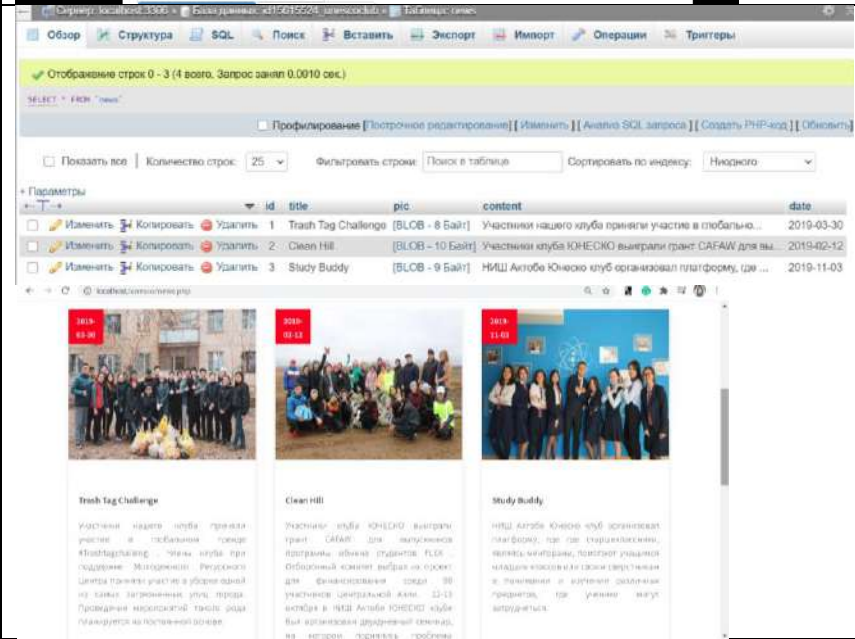

T2.2	Entered email is already used, so message "Аккаунт с данной почтой уже существует" appears	
T2.3	The data is too long, so they overrun given limit. For name and surname 255 for each one, workplace no longer than 100 characters, contact phone number no longer than 30 characters, email no longer than 100 characters, password and confirm password no longer than 50 characters	
T2.4	The phone number very important to write correctly as it will be used to add participant at What's App group and to contact, so it is asked to write in standard way to minimize number of errors	
T2.5	The email address is also one of the required criteria's of registration process, so it should be written correctly	
T2.6	The all data asked in registration is necessary for press-secretary, that is why no rows could be left empty and all of them required to be filled.	

T2.7	If password and password for confirmation will not match, the "error message" appears	
T3.1	When everything during registration and login stage is filled correctly, new participant directly goes to personal profile	
T3.2	If email or password are filled incorrectly, the "error message" appears	
T4.1	After log out user will be directly transferred to login page	

T5.1	The all required information for adding new administrators filled correctly, so new row in database and table created	
T5.2	The number of values exceeded the limit	
T5.3	If the empty adding administrators form submitted, the "error message" appears	
T5.4	If admin name is already used, user will see a message near the button. Message says "this admin name is busy"	

T6.1	From the UNESCO clubs main page admins can be transferred to login for separate page and if it will filled correctly, their admin panel opens	
T6.2	If admin login name or password written incorrectly, the error message appears on the top of the login form	
T6.3	The empty login name and password can not be submitted and the warning message will appear in the top of the login form	

T6.4	If only the administrator name is filled in, then everything is cleared and the message asks you to fill in the password at the top of the form, but the user must also write their name a second time, since this is the authorization of the administrator page, where security is very important.	
T7.1	The first picture shows that second admins name admin1 and password admin 1 are updated by admin2 in name and password, worth to note that id number is not changed	
T7.2	If data filled incorrectly, admin asked to fill form	
T8.1	The record is deleted in table and database respectively	
T9.1	The data about participation is entered correctly, so member is returned to profile and message "entry added"	

Запись добавлена

T9.2	In case data entered incorrectly, message will appear	
T10.1	In case everything filled correctly news will be saved in database and appear on news page	
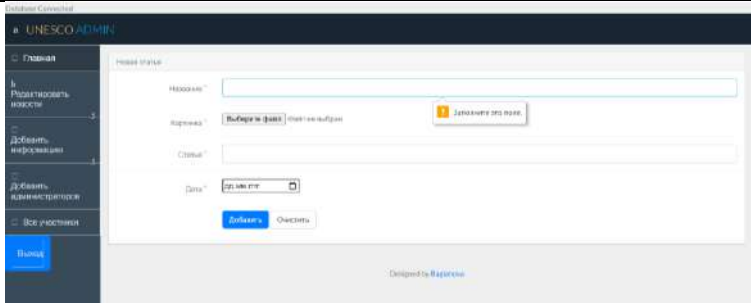

T10.2	In news form not all fields are entered, but form submitted. Appears message "fill in this field"	
T11.1	The row is deleted from table news	
T12.1	Everything entered correctly and projects are added to table events and on page new projects	
T13.1	In case name and surname entered correctly, the row with this member will appear	

Table 15 Evidence of testing

(iv) Installation

Installation plan

The installation plan was developed with the client after the testing all website after development process finished. Then development process was finished, client tested all website and with his permission we created installation plan.

74

1. Test system for errors
2. Give website, source code and documentation for test to the client and teacher
3. Start to add club members to the system
4. Start to receive reports forms of participation
5. Give login and password for admin page and teach how to login, add, delete and update data, search members, use links for website and check table with reports
6. Start to add new admins
7. Start to publish news and events
8. Start to receive reports and new members
9. Start implementation by agreed plan.

Training plan.
Suggested training date: 03.09.20

Training will be held online by Micorsoft Teams, where I will demonstrate my screen to show how to use website. The meeting will be recorded, so everyone could rewatch during making self-practice. Moreover, they will have user manual to show step-by-step every action.

System implementation plan:
Implementation method: Pilot Implementation

Reason: It is more convenient to check website work on a small focus group before new system goes live. The major advantage is that failure can be identified and addressed without wide-spread impact to the organization.

Proposed implementation date: 10.09.20

Reason: In case some bugs will be founded, in one week they will be fixed and system will be directly implemented.

Upload of files to the hosting:
There are various number of hosting servers, for my website I have chosen 000webhost. First of all, it is free and provides above-average features. Secondly, it was developed by Hostinger to provide free server hosting for both experienced users and beginners, so the site is easy to navigate and use its tools. In addition to this with its free data plan priced at $0, it offers significant storage space of 300MB, limited bandwidth of up to 3GB, and the ability to register a subdomain. it is worth noting that an SSL certificate is issued, which will serve as a digital certificate of your site, that the transmitted data is protected by a reliable encryption algorithm and will not be available to third parties for unauthorized viewing.

First step: I created a Google account for NIS Aktobe UNESCO Club.

Figure 105 creating email address for unesco club

Second step: I registered to 000webhost by this account.

Figure 106 creating in 000weebhost

Third step: I created a subdomain for future website and downloaded all folder and files from htdocs.
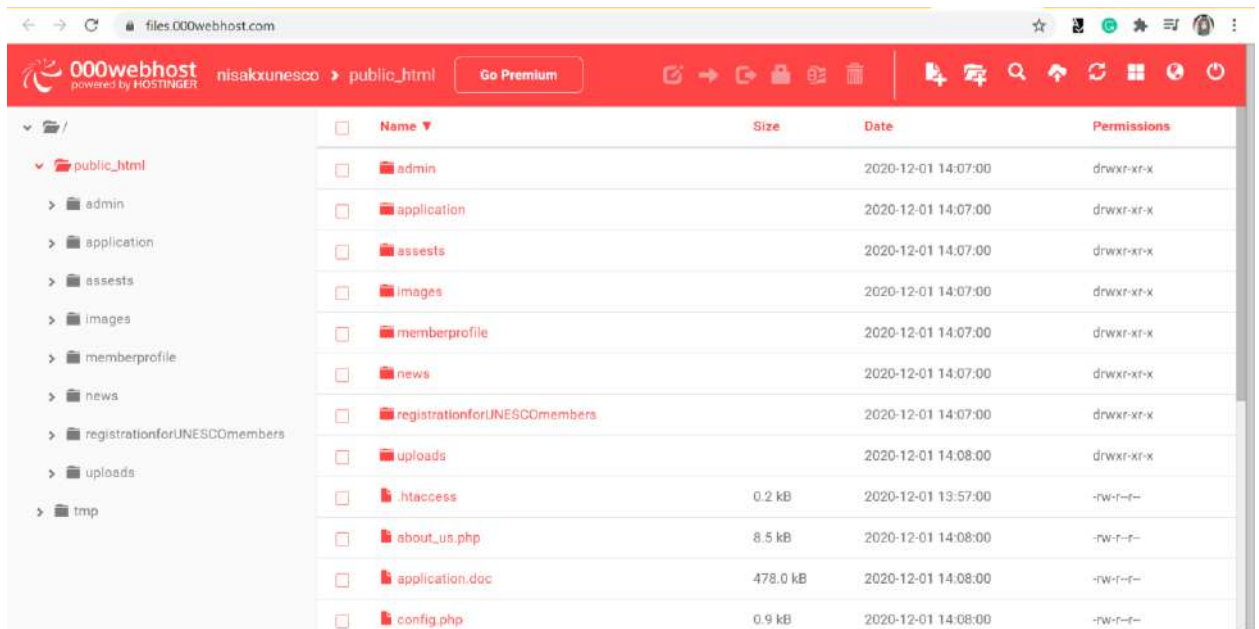

Figure 107 downloading all files
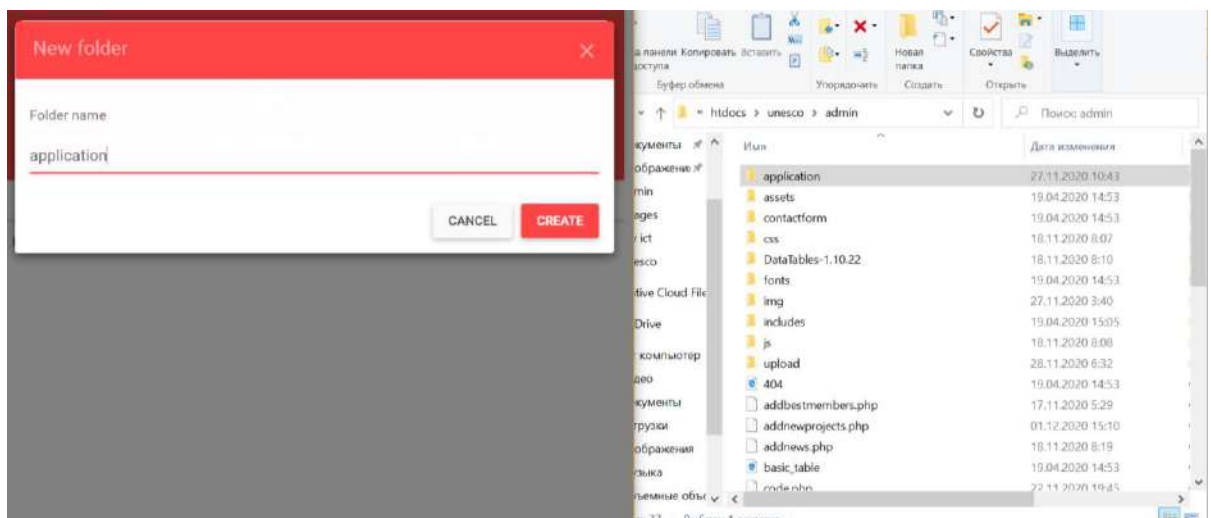

Figure 108 creating same folders as in my folder

Forth step: I created database in PHPMYADMIN by database manager with name "id15560604_unesco" and password " Un5zppmUwm]tP\m>", however now it is called quite different because of the host servers " id15560604_unescoclub".
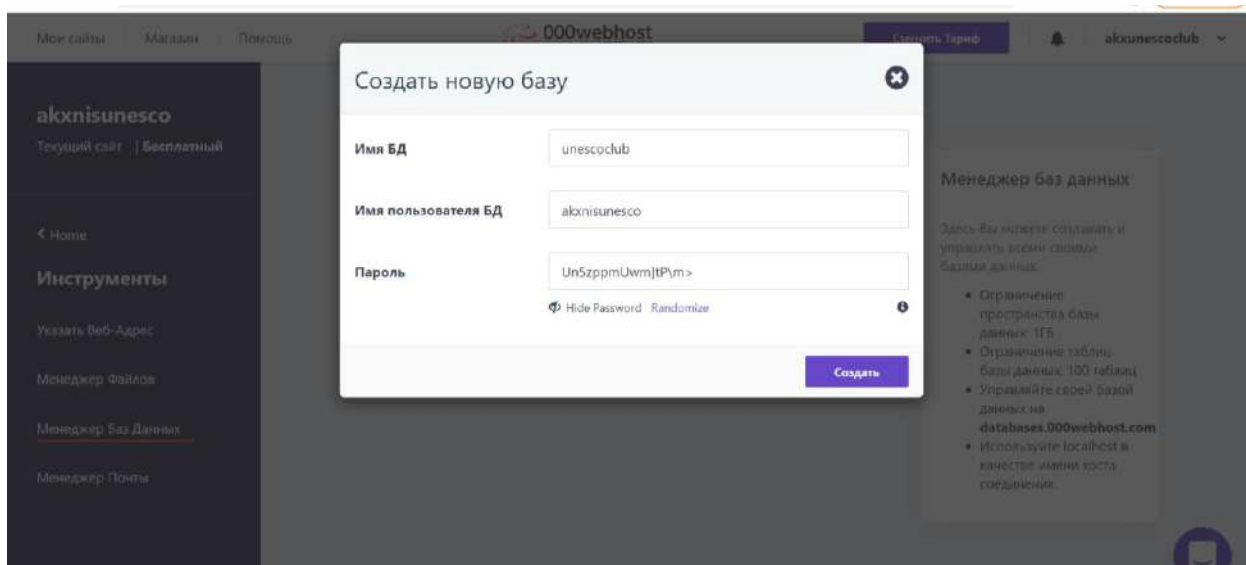

Figure 109 Creating new database

Step #5: Then I exported my previous database and imported in host server.
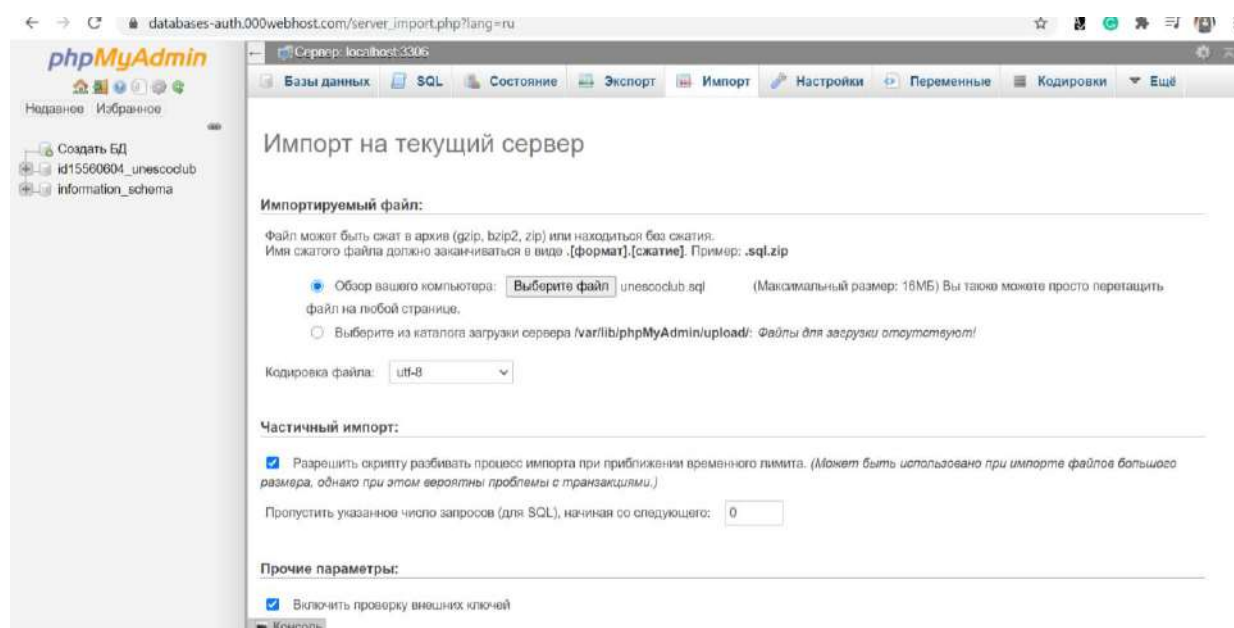

Figure 110 Import database unescoclub
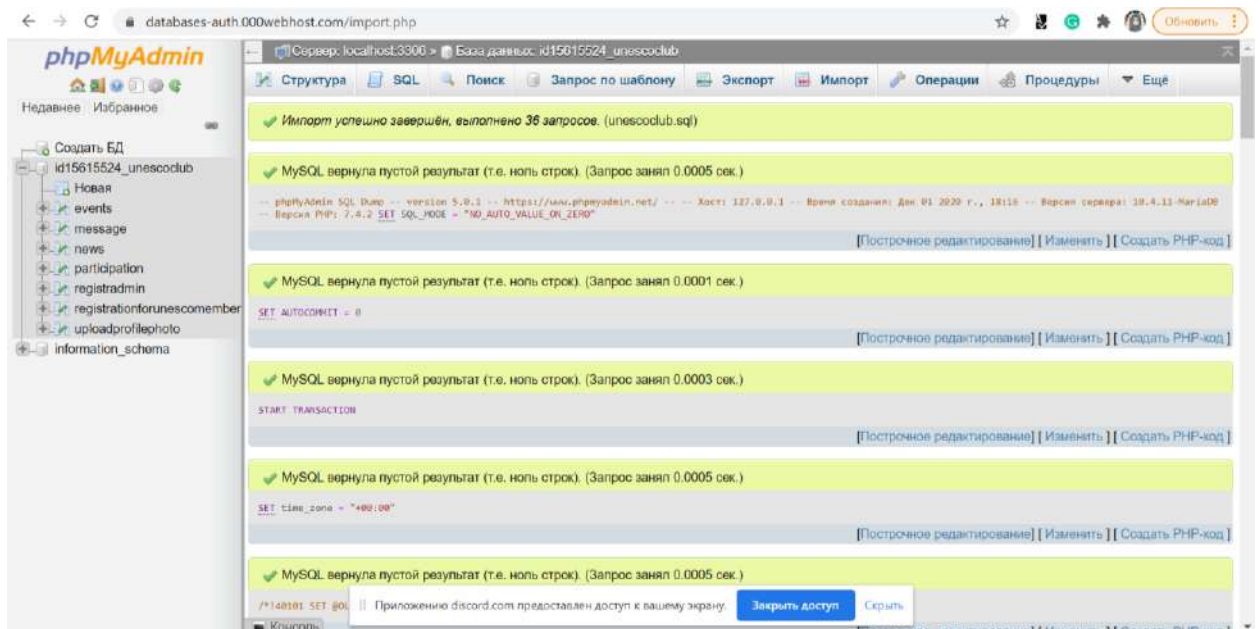

Figure 111 successful import database

Step #6: I changed connection to the database everywhere in the code, where it was requested.
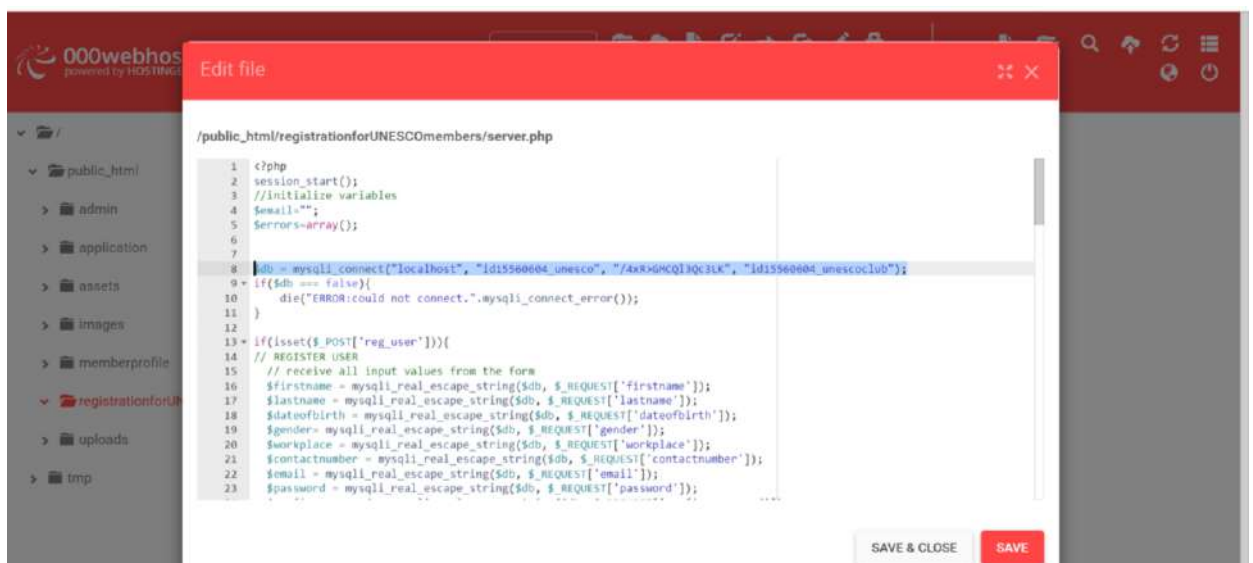

Figure 112 Changing database connection

Evidence of user testing

USER ACCEPTANCE TEST

To check the site for user performance, I sent the site to Yerzhan Umirzakov and the participants. After I asked to fill out a questionnaire with almost the same questions. Since Yerzhan is the President, he was also able to test the admin panel. Members of the Aktobe UNESCO club had general questions.
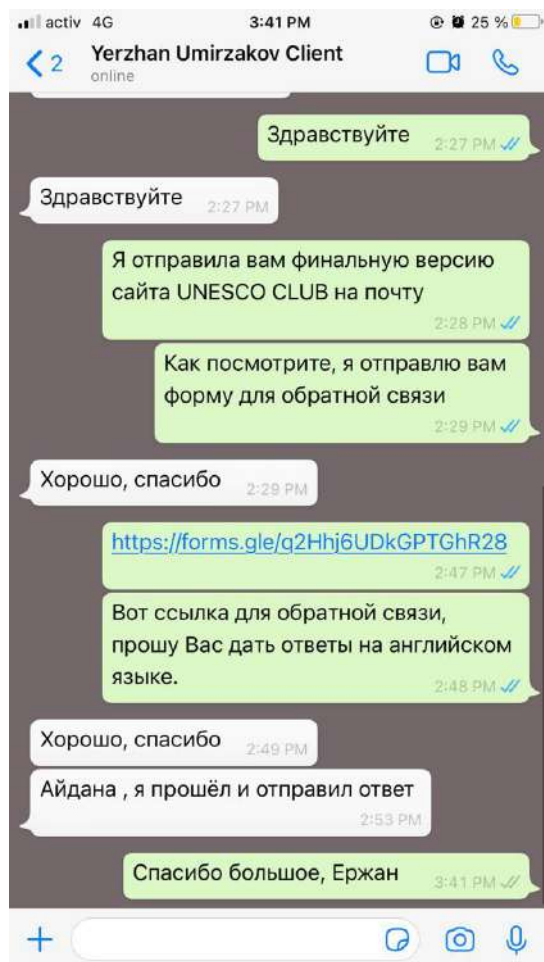

Figure 113 clients feedback
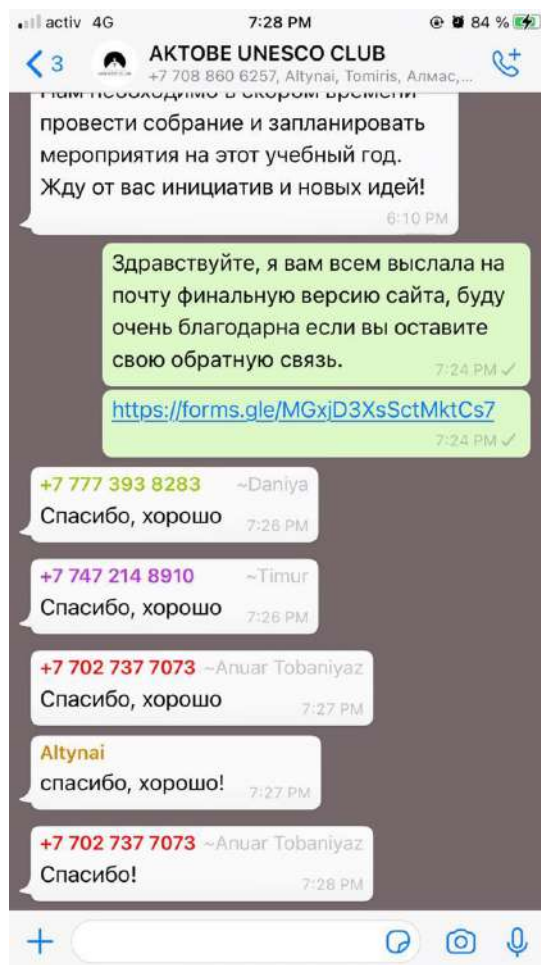

Figure 114 Users feedback

From the results of the survey could be seen that every client requirement achieved.
As I received positive feedback.

Did you have any problems during the registration process? *

No, it was very easy and much faster as if you forgot to fill something you will be asked to write.

Did you have problems with authorization? *

No, login worked well and my personal profile opened

Have you successfully logged in to the admin page? *

Yes, i used the login and password by default which you gave me to sign in

Have you updated/ deleted data from databases successfully? *

Yes, i checked both functions and very cool that you see all changes and even can add new admins.

Was the site design comfortable to use? *

Yes, design is made in comfortable for eye colours and animations of photos really interesting idea

Figure 115 questionnary for feedback
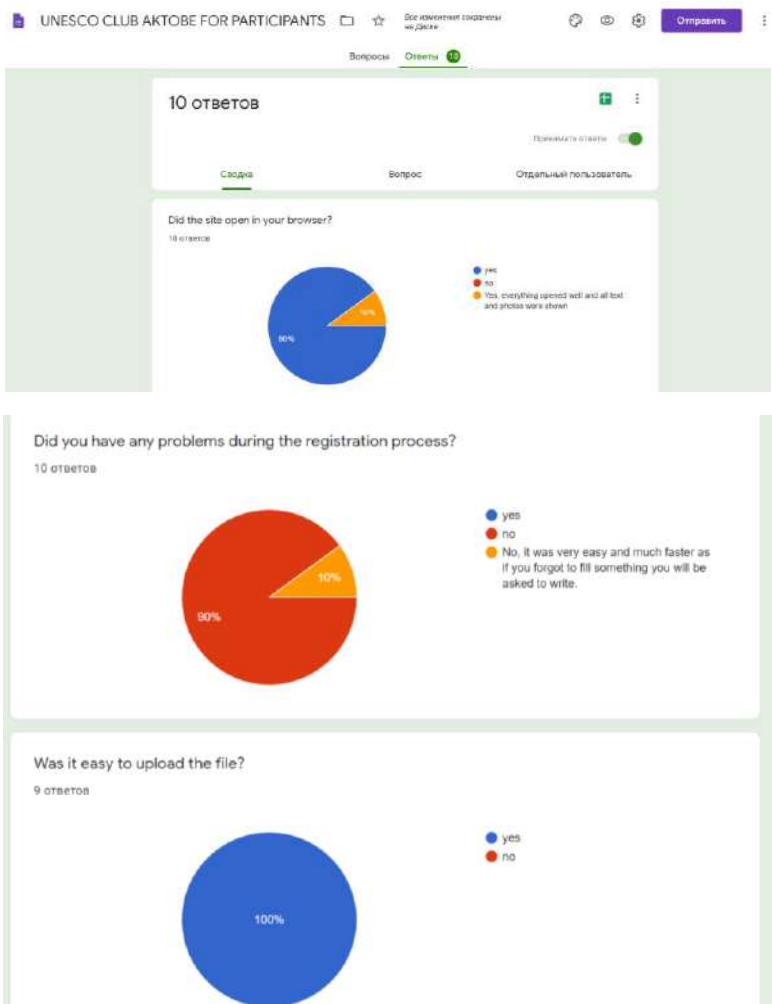

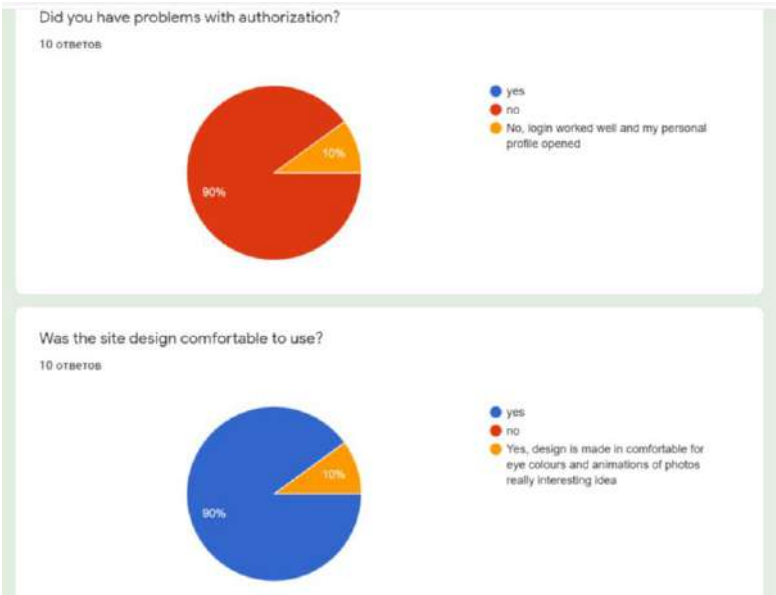

User feedback

From the questionary it is seen that final version of website satisfied Yerzhan and focus group from UNESCO Aktobe clubs participants, which contained 10 people. That is why, site is finished and there is no need for debugging in this stage.

Possible Adaptive Maintenance

To improve the system in the future, you can take the following steps:

1. Add alert message to confirm deleting of member
2. Store all delete users, so they could be reestablish

Back-up Procedure

Backups should be done on a regular basis as website includes updates of news and events. Moreover, as this website is open for everyone it can crush and loss of data, so to avoid and recover very quickly.

All you need is to export database.

(e)(ii) User Manual

MAIN PAGE

At this menu we could see 6 tabs
Now as red pointer shows we are on main page ("Главная")

The name of the website, which is placed at the top, could be you used as a link to return to main page

General information about club with links to read more on particular topic
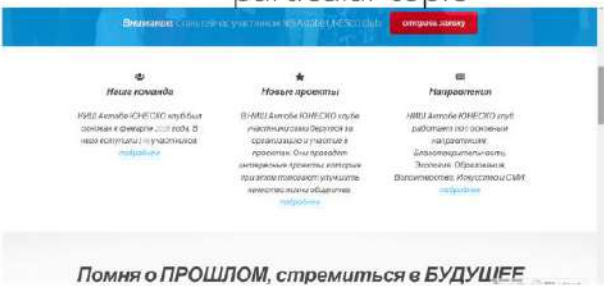

In that part you can familiarize with background information on clubs work divided by directions
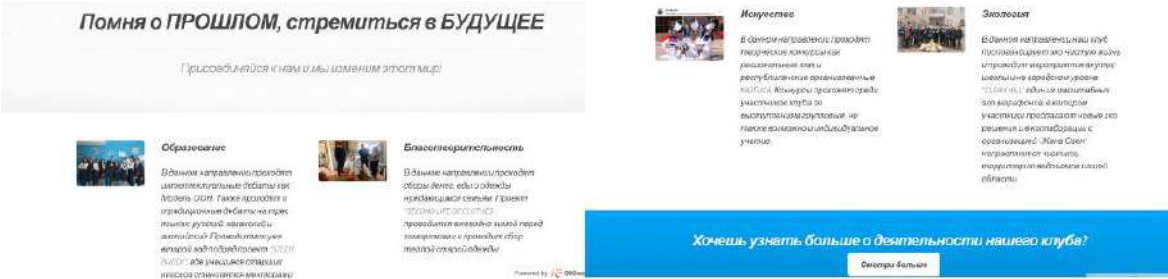

At the end of the page you can find clubs contact details
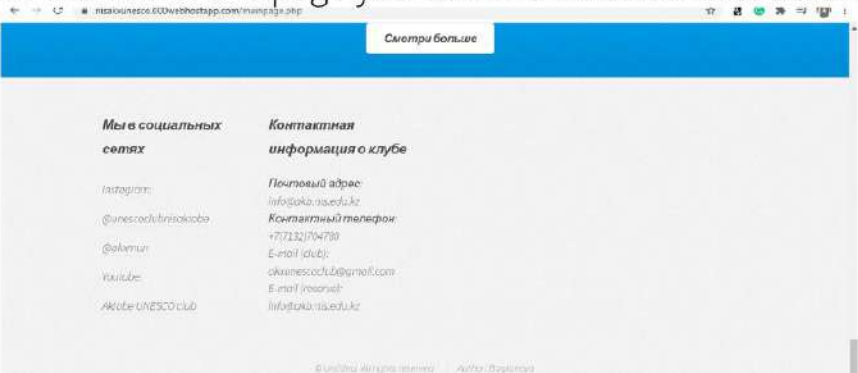

Figure 118 instruction on main page

All news are published here, they go from the latest to the newest

At the end of the page you can find clubs contact details

Figure 119 instruction on news page

There are 3 options of pages on for members ("Участникам") buton.
First called Projects ("Новые проекты"), where all events are published and they go from the latest to the newest

Second for new members("для новых участников"), where written requirements for becoming a member

At the end of the page you can find clubs contact details

Figure 120 instruction on events and new participants pages

Third option -is directions("направления клуба"), where you can get know about directions in pictures

At the end of the page you can find clubs contact details

Figure 121 instruction on directions page

Here red pointer show About us page ("О нас"), where all information about club placed mainly about history, goals and location

Figure 122 instruction on about us page

Here pointer shows lofin for personal profile ("Личный кабинет")

Instruction to log in:
1) Enter your email with which you registered(1)
2) Enter your password with which you registered(2)
3) Press button login("Войти")
In case you don't have an account click on link for registration("присоединиться").
After you can see a slider with photos of our members.

Figure 123 instruction for login

This is a registration form. All labels here are obligatory to fill.
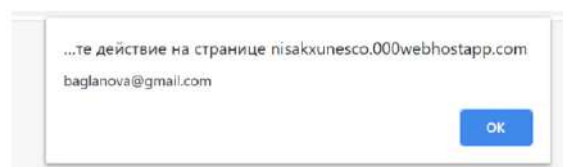

Here is instruction for registration:
1) Enter your name
2) Enter your surname
3) Select your date of birth
4) Select your gender
5) Enter your occupation and position
6) Enter your phone number
7) Enter your password
8) Repeat your password for confirmation
9) Familiaze with participation fee and click good("Хорошо"), which shows your agreement
10) Download file with application ("Нажмите для скачивания"), after you need to upload a filled document. Submit your application by pressing button ("Отправить")№
In case you have an account, you need to click on enter link.

Figure 124 instruction for registration

Common Error Guide

Error	Cause	Solution
Message: "Fill this field"	Field in registration is not filled	Fill all required fields
Message: "Enter data in required format"	Phone number written incorrectly	Write phone number as it is required "8-xxx-xxx-xx-xx"
Message: "the email address must contain the "@ " symbol. The "#" address is missing the @symbol."	Email address written incorrectly	Write email address in required format
Message: "enter the part of the address after the " @ " character . The " # " address is incomplete."	Email address written incomrrectly	Write email address in required format
Message: "Passwords don't match"	The confirmation password doesn't match password	Rewrite passwords similarly
Message: "Account with this email already exists"	There is already registered account with this email	1.Login if you registered previously 2.Use different email
Message: "Email and password written incorrectly"	The entered email and password written incorrectly	Recheck login and password
Message: "You need to enter a day"	The field is empty	Enter a day of the news
Message: "You need to insert a month"	The field is empty	Enter a month of the news
Message: "Required to enter name"	The field is empty	Enter a name of the article
Message: "You need to enter a description"	The field is empty	Enter a content for article
Message: "You need to insert a link"	The field is empty	Enter a link to the article

Table 16 Common errors

Back-up full guide

The website was initially archived in zipfile, so there is no need to back-up file manager. But, if client wants, he could do it in hosting server by changing tariff to Premium, but as my client required using free hosting, I can send an archived file and it is worth to mention that file manager doesn't require backup as often as backup of database.

However, in case website get ruined, it will be enough to import zip file into file manager. It is very important to name folders in same case as in that file.
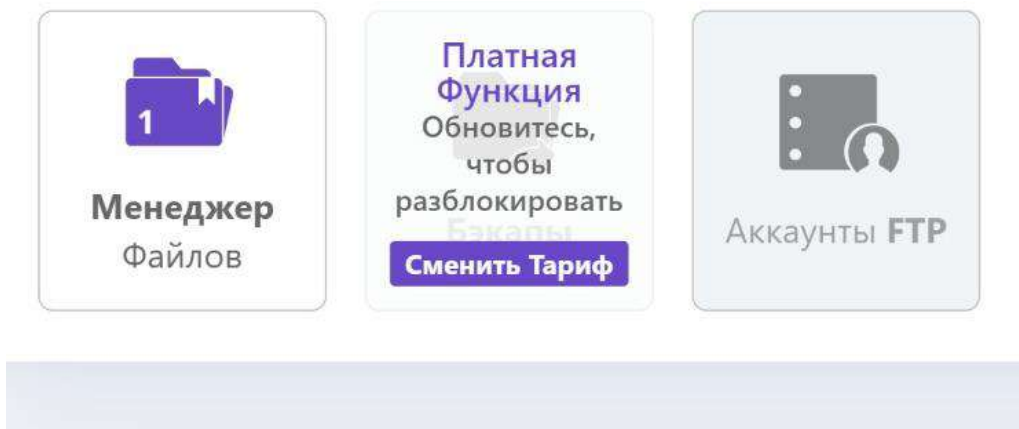

Glossary
XAMPP – web-server where database of the web site is placed.
SQL – declarative programming language used to create, modify, and manage data in a relational database.
Address bar – a string in the browser, with which you can quickly get on a particular resource by entering it URL.
Domain name - part of a network address that identifies it as belonging to a particular domain.
Session - a way to store information (in variables) to be used across multiple pages. Unlike a cookie, the **information is not stored on the user's computer.**
Hosting - needed for the website or webpage to be viewed in the Internet. Websites are hosted, or stored, on special computers called servers.
Images - The img tag embeds an image into your HTML.
Links- Link elements are used to connect your document to a related resource.
Tables - An element for displaying information in rows and columns.
Hardware - A peripheral device that is used with a computer to enable or simplify its opertation.
Query - A request for data or information from database.
Database - a comprehensive collection of the data organized for convenient access.

(f) Evaluation

(i) Discussion of the degree of success in meeting the original objectives
List of agreed objectives

Site design:
1. User-friendly design
2. The site should have the logo of the club

Site features:
1. The main page with a place at the end to leave active links for social medias
2. A news page with the opportunity to add them by admin
3. An "about us" page with essential information about our club's history
4. Registration form with necessary information about member also add an application and additional question about fee

5. Login form and personal profile
6. Form to add by particular user a participation in projects by KAZFUCA
<div align="center">User features:</div>

1. User should add participation on projects
2. Users should register and attach filled registration
<div align="center">Admin features:</div>

1. Admin should be able to add new admins
2. Admin should have a personal page to see reports and members
3. Admin should have the opportunity to add news

Degree of success

According to the testing and evaluation, it can concluded that all agreements are successfully archived. (During the implementation, testing and installation processes).

#	Objectvives	Evidence

(f)(ii) Evaluate client's and user's response to the system
Client's Response

"Aidana, thank you very much for your work.
The website for our club is a big step in the development of our club.
I would also like to note that you took into account all our criteria. This site system fully corresponds to the work of our club. The design was very interesting, I liked your approach to work and how the site was organized logically. Creating a personal account for participants to send the form makes it very easy and automates all the processes of our club. And the ability to publish news and projects through the admin page using the same template creates a beautiful format. The search engine for participants and the ability to edit them are very practical when working with participants. The main thing is that you took up this project and brought it to the end! This is a very big job and I congratulate you on this achievement! You are a great fellow that despite the quarantine ended in due time.
Best regards, Yerzhan Umirzakov!"
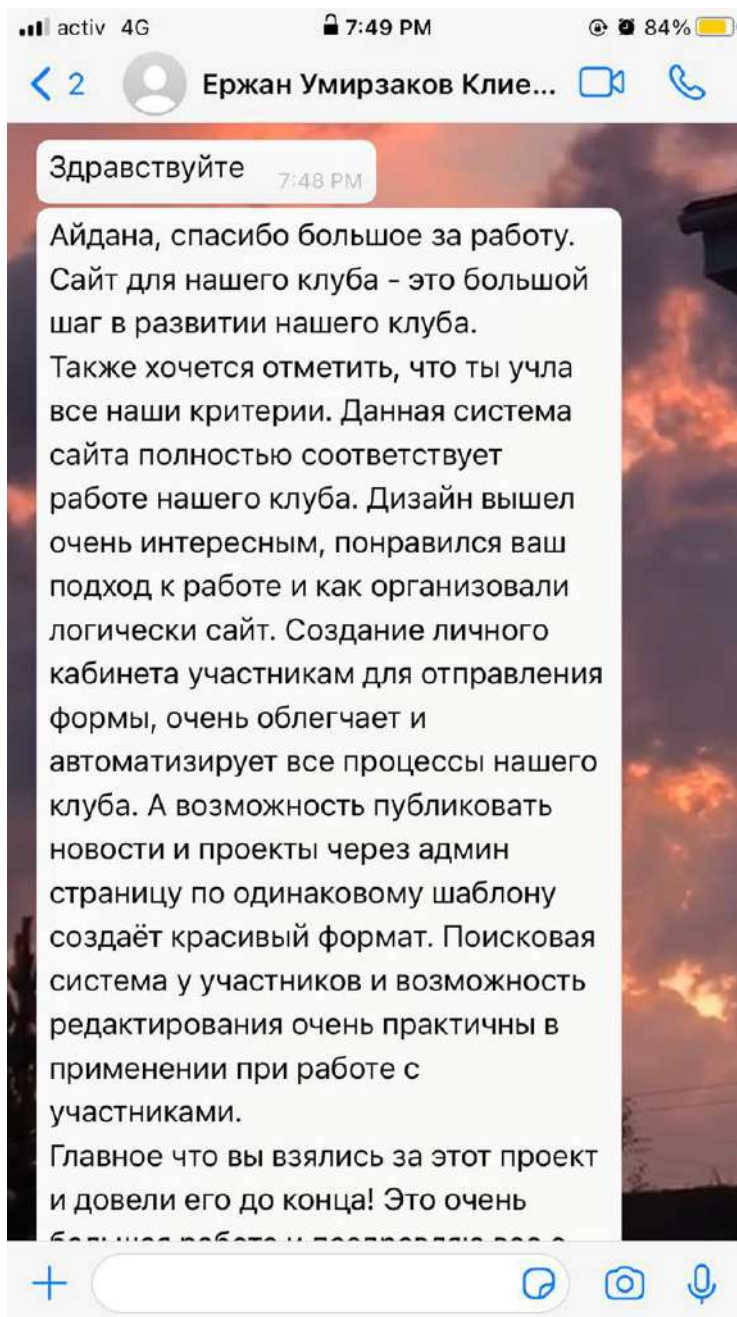

Здравствуйте   7:48 PM

Айдана, спасибо большое за работу. Сайт для нашего клуба - это большой шаг в развитии нашего клуба. Также хочется отметить, что ты учла все наши критерии. Данная система сайта полностью соответствует работе нашего клуба. Дизайн вышел очень интересным, понравился ваш подход к работе и как организовали логически сайт. Создание личного кабинета участникам для отправления формы, очень облегчает и автоматизирует все процессы нашего клуба. А возможность публиковать новости и проекты через админ страницу по одинаковому шаблону создаёт красивый формат. Поисковая система у участников и возможность редактирования очень практичны в применении при работе с участниками.
Главное что вы взялись за этот проект и довели его до конца! Это очень
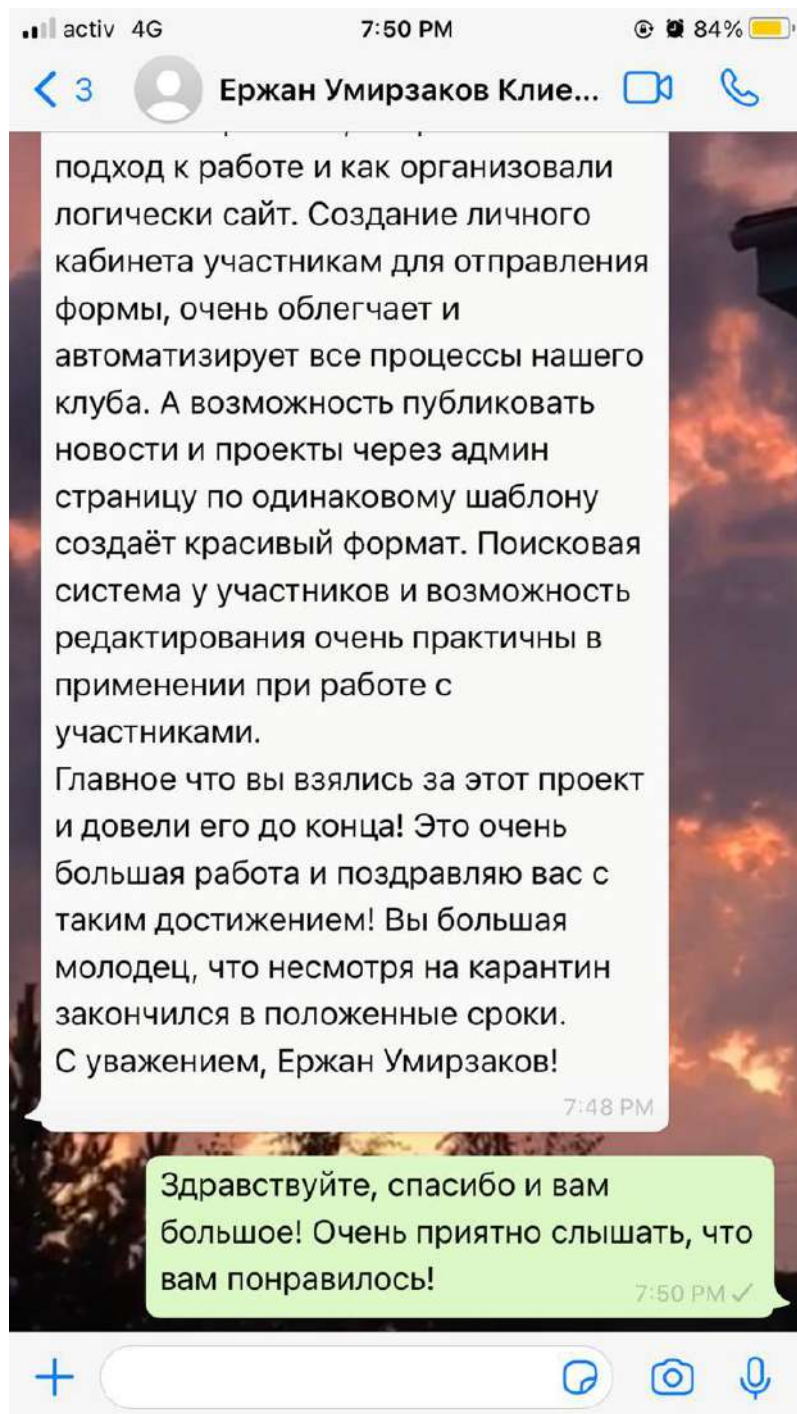

Figure 126 Clients feedback

User's response

In order to collect user feedback, I created an online questionary by Google Forms. It consisted of seven questions. Five questions were in the form of test 1 in the form of a rating scale and 1 for writing feedback and wishes. The survey was attended by 19 users and below you can see the results and charts for the results of each question.

There are questions of the survey:

1. Does the website open properly?
2. Do all functions on the website work?

3. Do you meet any difficulties with registration?4. Have you tried sending messages through this site?

5. Could you download the application form?

6. Could you upload the application form?

7. Do you see the right personal information on your profile?

8. Could you submit participation in KAZFUCA's projects form?

9. Do you have any recommendations?

Figure 135 Responses for 9th question

Analysis of client's response

I received positive feedback and positions, which is invaluable for me, as it proves that I was able to cope with a difficult task. Website development is a new field for me, which I visited as a pioneer and researcher, having received a lot of new knowledge and skills, I can confidently declare myself an expert. In fact, finding a solution myself, finding more effective methods of working with the old and familiar system, helped me develop some more critical thinking skills, which will certainly be a necessary experience in the future. Thus, by automating the club's work system, I have contributed to the development of technology in everyday life. Of course, I also faced problems, the code never worked the first time and the system did not always give me the expected result, my plan sometimes did not converge with the real situation, but thanks to this, I now know how to adapt to the conditions in which I am. In addition, the work was done on a certain deadline and this helped me develop a time-management. Working with a client is a very interesting experience of the modern day and I am happy to master it successfully.

Analysis of user's response

Many participants from the focus group who tried out the site and passed the survey were generally happy. If you go through the questions, then from the first question it is clear that everyone liked the new system on 5 out of 5. The rest of the questions to check the operation of the system were passed successfully and in the last open question for wishes there are no negative reviews, but only positive impressions.

Казахстанской

        Национальной Федерацией Клубов

        ЮНЕСКО и Региональным Представителем Клубов ЮНЕСКО в г.Актобе

        </p>

        <h2> Основание клуба</h2>
```
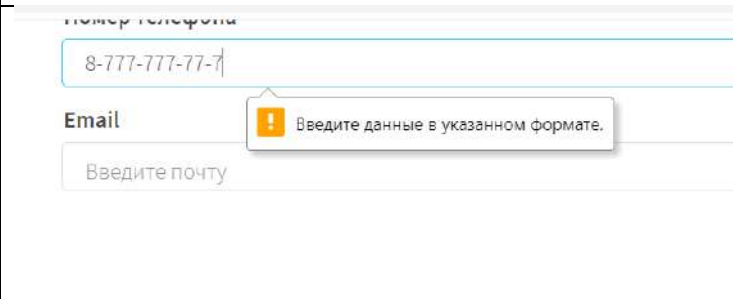

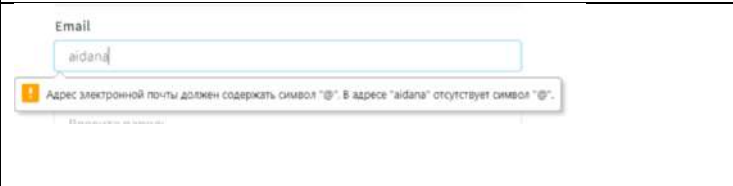

<p>Данный клуб основался в феврале 2019 года и первым его руководителем был директор НИШ ФМН г.Актобе

Сабиржан Умиртаевич и первый президент Ержан Умирзаков. На данный момент в клубе состоят 148 человек.

Клуб ЮНЕСКО – это объединение людей всех возрастов, всех социально-профессиональных слоев, разделяющих идеалы ЮНЕСКО, стремящихся

к их распространению и приобщению к делу международной организации ЮНЕСКО по всем направлениям, включенным в понятие наука,

культура и образование.</p>

<h2> Цели клуба и задачи</h2>

<h3>Целью деятельности Казахстанской Федерации Клубов ЮНЕСКО (KazFUCA) является:</h3>

<p>пропаганда идеалов ЮНЕСКО, прежде всего, мира и терпимости, чувства ответственности за распространение идей мира; </p>

<h3>Задачами деятельности KazFUCA: </h3>

<p>содействие развитию мирного общества, основанного на принципах солидарности, через образование,

науку и культуру с целью дальнейшего всеобщего соблюдения справедливости, законов, прав человека и

фундаментальных свобод народов всего мира для обеспечения культурного равноправия без дискриминации по расовому,

половому, национальному, языковому или религиозному признакам. </p>

<h3>Предметом деятельности организации являются:</h3>

<p>1)стимулирование, планирование и оценка программ ЮНЕСКО в Казахстане;

2)содействие открытию и утверждению новых Клубов ЮНЕСКО;

3)помощь в обучении членов Клубов ЮНЕСКО;

4)поддержка сотрудничества между клубами и Ассоциированными Школами ЮНЕСКО;

5)издательская деятельность в области науки, культуры и образования;

6)проведение опросов общественного мнения и других исследований;

7)проведение образовательных и тренинговых программ и семинаров по вопросам, входящим в спектр направлений ЮНЕСКО;

8)подготовка и реализация программ по профессиональным, научным и культурным обменам для детей, молодежи и взрослых.
